Spaceport Infrastructure Maintenance and Operations (SIMO)
Responses to Draft Request for Proposal (RFP) Questions

No.	DRFP Area	Section	Paragraph No.	Page #	Question	Response
1	Attachment J-01 PWS	1.10.2	1	42	PWS states "Ensure at least two facility managers hold a Certified Facility Manager credential from the International Facility Management Association (IFMA) in compliance with the 40 United States Code (U.S.C.) 581, Federal Buildings Personnel Training Act of 2010." Is there a grace period for obtaining this credential if assigned facility managers do not possess it at contract start?	No grace period will be permitted. All proposed facility managers must meet this qualification at contract start.
2	Attachment J-01 PWS	1.10.2	2	42	PWS states "Ensure all facility managers hold the Facility Management Professional credential from IFMA or equivalent, as approved by the COR or TMR." Q#1: Is there a grace period for obtaining this credential if one or more assigned facility managers do not possess it at contract start?	See response to question No. 1. All proposed facility managers, regardless of title, must meet qualifications at contract start.

					Q#2: Does this requirement apply only to facility managers and not associate facility managers?	
3	Attachment J-01 PWS	3.2.10.1	2	98	PWS states in part "Facility numbers M6-1623 through M6-1629 as identified in Attachment J-12, Government Furnished Facilities are blasting and protective coating facilities." The referenced attachment shows four (4) facilities listed as blasting and protective coating facilities: M6-1623, M6-1625, M6-1627 and M6-1628. There is not a facility M6-1629 on the list. Please clarify.	Attached J-12 Government Furnished Facilities will be revised to add facility M6-1629, Compressor Building.

4	Section I	FAR 52.219-9	N/A	41	Section I lists FAR 52.219-9 both as a January 2026 Deviation and as Alternate II dated November 2016, while Sections L and M require Alternate II. Which version governs the plan the Offeror must submit in Volume 4?	FAR 52.219-9, Alternate II, applies. NASA's contract writing system lists both the basic clause and its alternate, when an alternate applies.
5	Section L	Attachment L-05	Fully burdened IDIQ labor rates	N/A	Section M evaluates fully burdened IDIQ labor rates multiplied by Government provided BEQs, and Section B provides for task orders priced under Attachment J-06. Attachment J-06 is a cover page only, Attachment L-05 contains no IDIQ fully burdened labor rate worksheet, and no BEQs by Government standard labor category are provided. Where is the Offeror to enter these rates, and what BEQs will the Government apply?	Section M evaluation criteria will be updated to clarify.

6	Section L	NFS 1852.215-81 Proposal Page Limitations	(a)	71	The page limit table lists Management Approach and Technical Approach under Volume I with a 125-page limit; the 35-page limit applies to Volume II Past Performance. However, Section L, Introduction and General Proposal Requirements, paragraph (b), names Volume 1 "Technical Acceptability," and the Volume 1 instructions specify Contract Phase-In, Organizational Structure, Staffing Plan, and Business Operations and Scheduling. Will the Government align the table headings with these instructions and confirm that the 125-page limit applies collectively to the four Volume 1 sections, excluding content identified under Volume IV as stated in the table's footnote 1?	The NFS 1852.215-81 Proposal Page Limitations provision will be updated to remove references to Mission Suitability.

7	Section L	NFS 1852.215-81 Proposal Page Limitations	(a)	72	The Volume IV line of the page limit table reads "Data required by L.6.2 paragraph (b)(2)," and there is no Section L.6.2 in this solicitation. Will the Government correct the cross-reference?	NFS 1852.215-81 Proposal Page Limitations (a) will be amended to clarify.
8	Section L	NFS 1852.215-81 Proposal Page Limitations	(b)(8)	73	Paragraph (b)(8) states that the total page limitation for Mission Suitability, to include all subfactors, is combined and that the Offeror shall determine the appropriate page distribution among the subfactors. This solicitation contains no Mission Suitability factor or subfactors. Will the Government delete the paragraph?	The NFS 1852.215-81 Proposal Page Limitations provision will be updated to remove references to Mission Suitability.
9	Section B	AbilityOne Subcontracting	(a)	28	The percentage entry in the AbilityOne Subcontracting clause (a) is blank while the clause narrative in (c) states at least 1 percent. Will the Government populate the clause in (a) in the final RFP?	The Government will populate the fill-in in Section B, AbilityOne Subcontracting, paragraph (a) to reflect the awardee's AbilityOne goal included in its Small Business Subcontracting Plan, which

						must meet or exceed 1 percent.
10	Attachment J-03, Contract Schedule Tables	Attachment J-03	CLIN 002	N/A	Attachment J-03 identifies CLIN 002 as cost reimbursement while Section B describes it as Core Work under a fixed-price arrangement. Will the Government confirm and correct the contract type for each CLIN so that Section B, Attachment J- 03, and Attachment L-05 agree?	Attachment J-03 will be revised to clarify to align with Section B and Attachment L-05.
11	Section F	Place of Performance	N/A	16	Section F identifies the place of performance as "Wallops Flight Facility (WFF), Florida." Wallops Flight Facility is located in Virginia. Will the Government correct the state?	Yes. Section F will be revised to clarify.
12	Section L	NFS 1852.219-73	(b)	73	NFS 1852.219-73 states that "the apparent low bidder must submit the complete plan within 15 calendar days after" request. This acquisition is a negotiated trade-off	The NFS 1852.219-73 Provision will be deleted.

					procurement, and Section L requires submission of the subcontracting plan in Volume 4 with the proposal. Since there is no "apparent low bidder" under this acquisition strategy, will the Government remove this provision or tailor it to align with the Volume 4 submission requirement?	
13	Section L	Volume 3 Price Instructions	(a)	65	Paragraph (a) of the Volume 3 Price Instructions runs from subparagraph (8) to subparagraph (10) with no subparagraph (9). Will the Government correct the numbering and confirm that no requirement has been omitted?	Yes. Volume 3 Pricing Instructions(a)(1-9) will be updated.
14	Section M	NFS 1852.214-71	(a) and (b)	82	NFS 1852.214-71, Award Grouping, appears in Section M. The provision is drafted for sealed bidding: it refers to an Invitation for Bids, to aggregate bids, and to rejection of a bid as nonresponsive, and its aggregate award entry	Provision1852.214-71, Award Grouping, will be deleted.

					reads "Not Applicable." Will the Government delete the provision from this negotiated acquisition?	
15	Sections L and M	Attachment J-01, PWS, Section 4.6.1 No. 27	(a)(1)(iii)	77	Section M identifies the Offeror's response to Attachment J-01, PWS 4.6.1 No. 27, Use of Artificial Intelligence (AI) During Contract Performance, as an award-eligibility requirement. Section L does not provide detailed submission instructions for this response, although the NFS 1852.215-81 page limit table lists "Data required for Artificial Intelligence Solutions" under Volume IV, Plans and Other Data. Will the Government confirm that this Volume IV entry addresses the response required by PWS 4.6.1 No. 27 and specify the required content, applicable page limit, and file format?	1852.215-81 Proposal Page Limitations will be revised.

16	Attachment J-02, Deduction Schedule	Attachment J-02	Deduction Schedule Items 4 and 5	N/A	The note callouts in the Deduction Schedule are reversed. Item No. 4, Late or rejected Data Requirement, refers to Note 1, but Note 1 is titled as applying to Item No. 5 and lists the two financial deliverables. Item No. 5, Late or rejected financial Data Requirement, refers to Note 2, but Note 2 is titled as applying to Item No. 4 and lists the general deliverables. Will the Government swap the note references?	The Deduction Schedule will 6be revised.
17	Attachment J-02, Deduction Schedule	Attachment J-02	Note 2	N/A	Note 2 lists "2.2-02 Annual Work Plan" and "1.2-09 Facility Price Report." Appendix J-01-04, Data Requirements List, numbers the Annual Work Plan as DRD 2.1-02 and titles DRD 1.2-09 the Facility Pricing Report. Will the Government correct the number and the title?	The Deduction schedule will be revised.

18	Section L	Past Performance Volume Instructions	(c) (3)	62	The Past Performance volume requires a signed letter of commitment from parent/affilate as applicable, "(3) Include a signed letter of commitment from the parent/affiliate corporation in the case of workforce or other resources". Can the Government please clarify if these letters for each affiliate is considered outside of page count?	NASA FAR Supplement 1852 215-81 Proposal Page Limitations will be updated for the letter of commitment to be outside the page count.
19	Section L	1852.215-81 Proposal Page Limitations. (Apr 2015)		73	Section (7) states "Text within graphics shall use a point type not smaller 10-point type. Text within tables shall use a point type not smaller than 12-point type." Would the Government consider revising the requirement to permit 10-point font for text within tables, consistent with the 10-point minimum permitted for graphics, to improve readability while maximizing the efficient	1852 215-81 Proposal Page Limitations(b)(7) will remain unchanged.

					use of available proposal space?	
20	Attachment J-01 PWS	2.1.1.2 Computerized Maintenance Management System (Maximo)	1.a	46	PWS states "Within 30 days of contract effective date, update Maximo to ensure assets identified in Tech Exhibit 3.1-2, FSEU Asset Reference List are captured in Maximo." Does "within 30 days of contract effective date" mean within 30 days AFTER full contract start date?	Yes. See Appendix J-01-01 Glossary, for the term "contract effective date."
21	Attachment J-01 PWS	2.1.1.2 Computerized Maintenance Management System (Maximo)	2.a	47	PWS states "Within 90 days of contract effective date, develop a workflow to ensure National Fire Protection Association (NFPA)-required PM reports for protective systems, excluding EPACS, are digitally reviewed and signed by the NASA fire protection engineer as the owner/owners representative prior to closing the PM work order." Does "within 90 days of contract effective date"	See response to Question 20.

					mean within 90 days AFTER full contract start date?	
22	Attachment J-01 PWS	3.2.7.3 System Specific Operation		91-92	PWS is numbered 3.2.7.3.1 through 3.2.7.3.4. The next subsections are numbered 2 and 3. Will the Government please correct this discrepancy in numbering sequence?	Yes. Attachment J-01 PWS will be updated.
23	Section L Other Proposal Instructions	1852.215-81 Proposal Page Limitations. (Apr 2015)	(a) Volume II Past Performance	72	Considering that Offerors must establish relevancy of up to 10 past performance efforts for Offerors, affiliates, and major subcontractors by providing narrative in 12 point font for the extensive list of items in Section L Volume 2 Past Performance: (c) (1) through (3) [affiliate meaningful involvement including a detailed table of what resources will be responsible for PWS sections down to the third level];	The Government will retain the 35-page limit for Vol II Past Performance.

					(d) (1) and (2) [recency and size]; (3) (i)(A) through (G) [technical areas]; (ii) through (v) [additional relevancy elements]; (e) (1) though (10) [specific contract information, description of work scope, and additional contract management performance elements]; (11) (ii) through (iv) [safety summary of OSHA citations, EMF rate, DART, and TRIR] (12) [performance problems, corrective actions, delays, and terminations]; (13) [additional information] AND Section M Past Performance Evaluation (b) (3) and (4) [Offeror cooperation and responsiveness to negotiating changes and submission of contract deliverbles and prevention	

					and reduction in safety, health, quality assurance, and environmental problems]: Will the Government consider increasing the page limitation from 35 pages to 50 pages for Volume II Past Performance?	
24	Industry Engagement	DRFP Memo / SIMO acquisition website (technical/bidders library)	Pre-RFP industry engagement opportunities	N/A	Will the Government host a site visit or facility familiarization opportunity accessible to prospective subcontractors (not only prime offerors) prior to final RFP release, since facility familiarity materially affects subcontractor pricing and teaming decisions?	Yes. SIMO Industry Days are October 13 - 14, 2026. Detailed information is provided on the SIMO Procurement Site and sam.gov.

25	DRFP Sections A-M	INTRODUCTION AND GENERAL PROPOSAL REQUIREMENTS	a.b.5	59	This section identifying the required proposal volumes lists Volumes 1 through 4 and Volume 6, but does not include a Volume 5. Could the Government update the numbering as appropriate to ensure the proposal submission requirements are accurate and complete?	Introduction and General Requirements (b)(1-5) will be updated.
26	DRFP Sections A-M	Page Limitations	1852.215-81 Proposal Page Limitations. (Apr 2015)	73	The solicitation states, "The total page limitation for Mission Suitability (to include all subfactors) is combined and the Offeror shall determine the appropriate page distribution among the subfactors." However, Mission Suitability is not identified as a proposal volume. Could the Government please confirm whether this reference to Mission Suitability was intended to refer to Technical Acceptability, or otherwise clarify the applicable	The NFS 1852.215-81 Proposal Page Limitations provision will be updated to remove references to Mission Suitability.

					volume and page limitation requirements?	
27	DRFP Sections A-M	VOLUME 3 PRICE INSTRUCTIONS	Part 9	65	The referenced section skips from paragraph (8) to paragraph (10), with no paragraph (9) provided. Could the Government please confirm whether paragraph (9) was inadvertently omitted and update the solicitation accordingly?	The paragraph structure under Volume 3 Price Instructions will be updated.
28	DRFP Sections A-M	Page Limitations	1852.215-81 Proposal Page Limitations. (Apr 2015)	72	The Proposal Page Limitations table references "Data required by L.6.2 paragraph (b)(2)" under Volume IV Plans and Other Data. However, Offerors are unable to locate this referenced section within the Draft RFP.	The NFS 1852.215-81 Proposal Page Limitations section will be updated.

					Will the Government clarify the information required to be submitted under Volume IV, Plans and Other Data, including any applicable page limitations, and provide the missing content associated with L.6.2 paragraph (b)(2)?	
29	PWS 7.1.1.11				Must offerors propose Wallops staffing?	Offerors are not required to address undefined future Wallops support in their organizational structure, position descriptions, pricing, or staffing plan. Wallops support, if required, will be defined, proposed, and ordered as fully negotiated IDIQ Task order(s).
30	Section L	Small Business Subcontracting	(a)(2)	68	Are the Government-directed non-proposed ODCs, totaling $61,664,404.79, included in total planned subcontracting dollars for purposes of the subcontracting plan goals?	Subcontracting plan goals are proposed by the Offeror in accordance with the DRFP instructions for Volume IV and FAR 52.219-9, Alt II. Government non-proposed ODCs are identified separately and are not proposed by the Offeror; therefore, Offerors will include Government non-proposed ODC plug values directly in planned subcontracting dollars. Offerors may recover associated costs or

						fees via other cost elements as instructed in the Price Volume.
31	Section B	AbilityOne Subcontracting	(c)	28	The AbilityOne Subcontracting clause requires annual notification of the percentage of the total dollar obligated under the AbilityOne program, stated as at least 1 percent. Confirm the denominator of that calculation, specifically whether it is total dollars obligated under the contract or total subcontracted dollars, and whether IDIQ task order value is included.	See response to question 9.
32	Small Business Participation	Section L	(a)(2) — 25% minimum total small business utilization goal	69	The DRFP requires individual subcontracting plans to indicate, at a minimum, a 25 percent total small business utilization goal. Please confirm whether the 25 percent goal applies to total contract value (core firm-fixed-price CLINs plus IDIQ task orders) or	The 25% minimum goal applies to total contract value.

					to the core firm-fixed-price requirement only.	
33	Security Requirements	Section H (NFS 1852.240-75, Security Classification Requirements)	Application for security clearance submitted during contract phase-in	49	For small business subcontractors that do not hold a Secret facility clearance at time of award, please clarify the process and anticipated timing for sponsorship and initiation of the required facility and personnel security clearances. Will subcontractor personnel awaiting final clearance be permitted to perform unclassified portions of the work during the 45-day phase-in period, where otherwise authorized?	Sponsorship will be initiated by the prime/Government at award. Personnel awaiting final clearance may perform unclassified work during phase in, if otherwise authorized and consistent with Section H and site access procedures.

34	Past Performance	Section L — Volume 2 Past Performance Instructions	Past performance 'similar in size, content, and complexity'	61	For small business subcontractors whose directly relevant facilities O&M experience (e.g., work control, preventive maintenance planning/scheduling, procurement support) was performed at a smaller total contract value than SIMO, will the Government assess relevance at the work-area level in addition to total contract size?	Past Performance will be evaluated in accordance with Section M using the proposal information required by Section L. OTHER PROPOSAL INSTRUCTIONS/ELIGIBILITY REQUIREMENTS (a)(1). The Government will not provide evaluation advice outside the published criteria.
35	Small Business Participation	Section L	(a)(1)(ii) — enforceable vs. non-enforceable subcontractor commitments	69	Under the Small Business Participation factor, will the Government evaluate enforceable small business subcontractor commitments (with acknowledgement signatures of both parties, as described in Section L(a)(1)(ii)) more favorably than non-enforceable commitments?	The Government will consider the strength of commitments (including enforceable, bilateral acknowledgements) when assessing credibility of SB participation, consistent with Section L OTHER PROPOSAL INSTRUCTIONS/ELIGIBILITY REQUIREMENTS (a)(1)(ii).

36	Small Business Participation	Section L	(a)(1)(ii) — enforceable subcontractor commitments; post-award administration	69	If an offeror names specific small business subcontractors with enforceable commitments in its proposal, will post-award substitution or replacement of a named small business subcontractor require Contracting Officer approval?	No, however, small business utilization is part of the annual CPARS evaluations.
37	DRFP Section A-M	Section H, AbilityOne Subcontracting	Section H, AbilityOne Subcontracting (c)	28	"Section L, Other Proposal Instructions, paragraph (a)(2) states ""Individual subcontracting plans must indicate, at a minimum, a 25 percent total small business utilization goal within the plan. For individual subcontracting plans, the Offerors shall propose subcategory goals (VOSB, SDVOSB, HUBZone small business, SDB, WOSB, and HBCU/MSI) based on their independent assessment of the small business subcontracting opportunities for this requirement."" However, Section H, AbilityOne Subcontracting references reporting on AbilityOne participation and an ""at least 1%"" AbilityOne requirement. Will the	See response to question 9.

					Government please confirm whether SIMO includes an AbilityOne subcontracting requirement?	
38	DRFP Section H - Special Contract Requirements	Section H	Ability One Subcontracting	28	"Section H, AbilityOne Subcontracting, establishes an AbilityOne participation requirement of at least 1%. Given the nature of the SIMO requirement, including a workforce primarily consisting of craft labor and material purchases largely comprised of MRO commodities, Offerors may have limited opportunities to utilize AbilityOne sources. Will the Government consider removing the 1% AbilityOne requirement or, alternatively, revising the requirement to a best-efforts basis where participation is pursued to the maximum extent practicable?	No. The Government will retain an at least 1% participation requirement.

39	Draft RFP Section L	1852.219-73 Small Business Subcontracting Plan. (May 1999)	(a)	73 of 82	"The DRFP states, ""This provision is not applicable to small business concerns"" but Section M SMALL BUSINESS PARTICIPATION, AND SAFETY, HEALTH, QUALITY ASSURANCE, AND ENVIRONMENTAL EVALUATION (a) states, ""The Government will evaluate the Offeror's approach to small business participation for compliance with proposal instructions and FAR 52.219-9, Small Business Subcontract Plan, Alternate II"". Can NASA please clarify how prime small business concerns will be evaluated under Section M (a) Small business participation criteria? How will large business concerns be evaluated under this same requirement?	Provision 1852.219-73 is not applicable to this RFP and will be removed from the Final RFP.
40	Draft RFP Section L	1852.219-73 Small Business Subcontracting Plan. (May 1999)	(b)	73 of 82	"The DRFP states ""....The apparent low bidder must submit the complete plan within 15 calendar days after request by the Contracting Officer. "" The Evaluation Process (c) (page 78) in Section M indicates a Best Value of Past Performance and	See response to question 39.

					Price trade-off. Does this mean the evaluation criteria in M only applies to the "low bidder" in price?	
41	VOLUME 5 MODEL CONTRACT INSTRUCTIONS	OTHER PROPOSAL INSTRUCTIONS/ELIGIBILITY REQUIREMENTS	(a)	68 of 82	"The DRFP has instructions for providing small business participation that are similar to and reference FAR 52.219-9, Small Business Subcontract Plan, Alternate II, but the evaluation criteria in Section M does not align with Volume 5 Model Contract (page 81).	Yes. The Small Business Subcontract Plan is submitted with the proposal and evaluated for compliance in Volume V per Section M.
42	DRFP Sections A-M.pdf	"(a) Small business participation.		42	Page 68 indicates the Small Business Subcontracting Plan is to be submitted with the proposal, but page 73 (NFS 1852.219-73) states that “The apparent low bidder must submit the complete plan within 15 calendar days after request by the Contracting Officer.” Please clarify.	See response to question 39.

43	Section L	Small Business Subcontracting	(a)(2)	68	Is IDIQ Work included in the base against which the subcontracting plan goals are measured, given that IDIQ Work quantities are not established at proposal submission?	Yes, the IDIQ estimated value is included in the base.
44	Section F	Place of Performance	N/A	16	"Section B contemplates negotiation and issuance of task orders for services at Wallops Flight Facility, Section F lists Wallops Flight Facility as a place of performance, and Attachment J-03 provides a NASA/WFF CLIN 005 and a placeholder record for WFF-issued task orders. Attachment J-01, PWS 7.1.1 No. 11 requires engineering and engineering support services at Wallops, but does not define the specific tasks, workload, or required disciplines. Q#1: Will the Government provide the anticipated Wallops tasks, workload estimates, required labor categories and qualifications, and proposal pricing instructions before	The Wallops scope has not been accounted for in the L-01 Minimum staffing requirements, only in the maximum contract value. The support at Wallops Flight Facility is not currently defined. The government intends to negotiate an IDIQ Task Order in late 2027 to provide the required support. The estimated value of the Wallops Flight Facility support has been included in the maximum estimated IDIQ value. However, Offerors are not requested or required to address Wallops in their organizational structure, position descriptions, staffing plans, and other proposal responses.

					proposals are due? Q#2: If the detailed scope will be defined after award, please clarify whether and how Offerors must address Wallops in their organizational structure, position descriptions, staffing plans, and other proposal responses. Q#3: Has the contemplated Wallops scope been accounted for in Attachment L-01, Minimum Staffing Requirements?	
45	Attachment J-01, PWS	Attachment J-01	Performance Standard No. 1	N/A	Performance Standard No. 1 requires 99.5% to 100% completion of the total maintenance budget for each customer per fiscal year. Budget levels, funding timing, and customer demand are outside the Contractor's control. Please explain how the Contractor is held accountable for budget execution and how the standard is measured when a customer reduces or delays funding.	Performance Standard No. 1 will be updated to clarify that Government delays will be considered when calculating contractor compliance.

46	DRFP Sections A–M	Section L, Vol. 3 instructions	(c)(6)(i)–(ii)	66	Confirm that L-05 BEQs are evaluation-only and that invoiceable MSR revenue equals Attachment J-04 unit price × Government-authorized, completed/closed MSRs, not the BEQ extended value. Confirm that “no future adjustment … above or below the BEQs” means no unit-price change, not a guaranteed BEQ payment.	Yes. The Government will not consider a unit price change.
47	DRFP Sections A–M	Section B, MSRs clause	(a)(1)(iii)–(v) and (a)(3)	5	If combined MSR + IDIQ Work orders in a period fall below the stated IDIQ minimum ($75M base; $100M options 1–3; $25M option 4), will the Government order additional IDIQ Work, pay a shortfall, or treat the minimum as already satisfied another way?	In accordance with Clause 52.216 22 paragraph B, "the Government shall order at least the quantity of supplies services designated in the schedule as the" minimum"."
48	Attachment J-01 PWS	2.1.1.4.b–d		49-50	Confirm the band is set from the contractor’s ROM / estimated direct craft hours (P&E function), not from actual hours at closeout; that actuals are for validation only; and that after-the-fact upgrades will not be approved. If actual hours fall outside the assigned bracket, what is automatically recoded versus what needs	Confirmed. If actual hours fall outside the initially assigned MSR range, the work order will be recoded within Maximo for accurate historical tracking, but recategorization requires explicit COR/TMR approval in advance and will not be granted retroactively. The Contractor is therefore responsible for accurate estimating to avoid mis-categorization.

					COR/TMR approval?	
49	Attachment J-01 PWS	2.3, Outage Coordination and Processing	2.3.1.9	66	Entire section 2.3, and in particular 2.3.1.9, addresses significant contractor responsibilities for management, processing and coordination of outages. However, the SIMO scope summary on KSC SEB SIMO website still includes a statement that "NASA will also directly manage scheduling, outage coordination, infrastructure impacts, customer communications, transportation integration, and construction support activities." Please clarify as needed, and explain what role, if any, NASA will have in the outage approval process.	SIMO's role is limited to executing the outage coordination process for assigned FSEU, while NASA's SpOC performs the broader, multi-program integration function that extends beyond the SIMO contract scope. The Government will update the SIMO scope summary on the KSC SIMO SEB website.

50		bidders library file index-9	Row 37, Document Name - SIMO Historicals; Portfolio - N/A; Category - Historical Data and Info	Page 1 of 8	The SIMO Historicals file was not provided with the other documents in the Historical Data and Info category. Please provide at the governments earliest convenience.	See "Historical Data" file that was uploaded on August 18, 2026, under the "Historical Data and Information" section in the Bidders Library.
51	Section L - Instrs, Conds, and Notices to Offerors	VOLUME 1 TECHNICAL ACCEPTABILITY INSTRUCTIONS	(a)(1)	60	"Section L states that “Key positions within the Offeror's phase-in team must include the following, full-time position(s): Phase in Manager, Program Manager, IT Professional, Logistics Manager, and Business Analyst”	At a minimum, NASA requires the specific phase-in team positions or equivalent positions that meet the Government’s SLCs and minimum education and experience qualifications for each position. Potential bidders are welcome to propose additional key positions based on their historical success phasing in contracts of similar size, scope, and complexity to SIMO.
52		bidders library file index-9	Row 219, Document Name - GSDO-PLN-1002; Portfolio - 3; Category - KSC Documents	Page 4 of 8	The GSDO PLN 1002 file was not provided with the other documents in Portfolio 3. Please provide this file at the Government's earliest convenience.	Government added the plan to the bidders library under the " Portfolio 3 FPL MOU, EGS (GSDO) and KSC Documents" section in the Bidders Library.

53		bidders library file index-9	Row 227, Document Name - GSDO-PLN-1330; Portfolio - TBD; Category - KSC Documents	Page 4 of 8	The GSDO PLN 1330 file was not provided with the other Bidders Library documents. Please provide this file at the Government's earliest convenience.	Government added a secure file location on sam.gov to place the CUI documents. Organizations can request access through sam.gov.
54	Collective Bargaining Agreements	Collective Bargaining Agreements	N/A	N/A	Please provide the current collective bargaining agreements, including all wage and fringe benefit schedules, amendments, extensions, and successor agreements.	Current CBAs have been posted in sam.gov as CUI documents; "Collective Bargaining Agreements". Organizations can request access through sam.gov.
55	L Attachments	Attachment L-01	Attachment L-01	Summary TAB	What percentage of the Government's total minimum labor hours in each contract year from FY 2027 (Contract Year 1) through FY2035 (Contract Year 9, Option 4) does the Government estimate supports MSR execution versus Core Work?	The Government will not be providing a minimum labor hour breakdown to this level. Offerors have sufficient information to propose.

56	IT security – Contractor-operated systems				Question: Will the contractor operate or maintain any IT systems under SIMO (for example, work-control, CMMS or facility control systems listed in the bidders' library Control Systems Inventory) that require a NASA authorization to operate? If so, which cybersecurity standards apply? Identify any contractor-operated systems and applicable NASA IT security requirements and DRDs in the Final RFP.	Yes. Refer to Tech Exhibit 4.6-1 "SIMO Managed Application", PWS Section 4, and DRDs 4.6-01, 4.6-02, 4.6-03, 4.6-04, 4.6-05, 4.6-06, 4.6-07 and 4.6-08.
57	DRFP Section A-M	Section M, Past Performance Evaluation	Section M, Past Performance Evaluation (5)	80	Section M indicates that the Government will consider the past performance of each JV member when the JV itself lacks relevant past performance. To ensure the evaluation accurately reflects performance risk, will the Government clarify whether the relevance and weight assigned to a JV member's past performance will be commensurate with that member's proposed ownership interest, managerial control, key personnel responsibilities,	The Government will weight JV member past performance commensurate with each member’s proposed role and contribution to SIMO execution (ownership, control, key personnel, percent of work), as described in Section M.

					and percentage of contract performance? If this is the Government's intent, please consider revising Section M to expressly state that past performance will be weighted based on each JV member's anticipated role and contribution to contract execution.	
58	DRFP Section A-M	Section M, Past Performance Evaluation	Section M, Past Performance Evaluation	79	To ensure a fair assessment of performance risk, will the Government clarify that credit for Joint Venture past performance will be based on the offeror's actual performance contribution, including percentage of work performed, workforce provided, contract scope executed, and management responsibilities held? Otherwise, offerors with limited participation in a large Joint Venture contract may receive the same credit as the managing partner responsible for the majority of contract performance, which may not accurately reflect the offeror's demonstrated capability to perform the	See response to question 57.

					requirements of this solicitation.	
59	DRFP Section A-M	Section L Volume 2	Section L Volume 2 (d)(1)	62	Section L, Volume 2 Past Performance Instructions states that "Recent is defined as performance no earlier than October 1, 2021." For purposes of evaluating recency, will the Government confirm that contracts with a period of performance end date on or after October 1, 2021 are considered recent?	Section L Volume 2 paragraph (d) paragraph (1) will be revised in the final RFP to read as follows: Recent is defined as performance within the last five years of proposal due date, with a minimum of one year of performance performed within the five-year period (excluding phase-in).
60	DRFP Section A-M	Section L, Volume II	(a)	61	Could the Government please clarify the criteria that will be used to determine whether a subcontractor is performing “major or critical aspects of the requirement” and therefore qualifies as a major subcontractor? Is this determination based on workshare percentage, scope criticality, or a combination of factors?	A combination of factors: meaningful workshare percentage, critical scope areas, and essential responsibilities determine major subcontractor status for proposal and evaluation purposes.

61	DRFP Section A-M	Section L, Volume II	(c)	62	What specific criteria will the Government use to determine whether a parent or affiliate company is participating "meaningfully" in contract performance?	Please see Section L Vol II "Past Performance Instructions" paragraph (c) (1, 2, 3).
62	DRFP Section A-M	Price Evaluation	(b)(7) Option to Extend; L-05 Summary K6	80	Section M's 6-month extension evaluation lists Core, ODCs, IDIQ tasks and IDIQ labor rates, but does not appear to include MSRs. However, Attachment L-05 Summary includes MSRs in the extention pricing. Could the Government please clarify whether MSRs are intended to be included in the six-month extension evaluation?	Yes. MSRs will be included. Final RFP will be revised
63	DRFP Section A-M	Price Evaluation	(b)(6); L-05 Pricing Instructions table of contents item 10	80	Section M states that the extention evaluation will include both the IDIQ work task pricing and fully burdened IDIQ labor rates multiplied by the BEQs for FY 2035. However, the FY 2035 BEQs do not appear to be provided in Attachment L-05, and the referenced "IDIQ FBLR Blended" tab does not	Section M PRICE EVALUATION paragraph (b)7(i-iv) will be revised to clarify in the final RFP.

					appear to be included in the pricing workbook. Could the Government please provide the missing information and clarify the intended evaluation methodology for the six-month extension period?	
64	Attachment L-05	MSRs tab; Summary tab	MSRs rows 132–147 (FY 2035 BEQs); Summary K6	N/A (Excel)	FY 2035 represents a six-month period, but the associated MSR BEQs appear to reflect full-year quantities. Could the Government please confirm the intended FY 2035 MSR BEQs and update Attachment L-05 if necessary?	Attachment L-05 will be revised to clarify in the final RFP.
65	Attachment L-05	Summary tab	Summary B5, J5, K5 (Non-proposed ODCs)	N/A (Excel)	The 6-month Non-proposed ODC amounts are the annual amount ÷ 6. Should they be the annual amount ÷ 2?	This item will be revised to reflect the appropriate Non-proposed ODC amount for a 6 month period of performance.

66	Attachment L-05	IDIQ Work tab	Col H BEQs, FY 2027 (rows 4–45) and FY 2035 (rows 340–381)	N/A (Excel)	Pre-priced task BEQs are the same in the 6-month FY 2027 and FY 2035 periods as in full years. Should the half-year BEQs be halved, as the FY 2027 MSR BEQs are?	This item will be revised to reflect the appropriate BEQ amount for a 6 month period of performance
67	Attachment L-05 / PWS	MSRs tab	Col F, MSR300 lower bound (FY 2027, FY 2029–FY 2035)	N/A (Excel)	The MSR300 lower bound is 150 hours in every year except FY 2028, where the lower bound is identified as 200 hours. As a result, MSR300 overlaps with MSR200 (100–200). Which bounds apply?	Attachment L-05 will be revised to clarify in the final RFP.
68	Attachment J-05 / L-05	J-05 Task #39; L-05 IDIQ Work	SINs y022–y030	N/A (Excel)	Attachment J-05 lists 43 catalog tasks (#17–#59); however, Attachment L-05 includes rows for only 42 task. Specifically, Task #39 (KSC Event Planning and Management Support) has no L-05 row and does not appear to have a corresponding row in Attachment L-05. Could the Government please clarify whether Task #39 is intended to be priced and, if so, update Attachment L-05 accordingly?	Attachment L-05 will be revised to clarify in the final RFP.

69	Attachment L-05	IDIQ Work tab	Col AA (unit price) vs. col AB (extended price)	N/A (Excel)	The unit price in Column AA excludes Other Labor, while the extended price in Column AB includes it. Could the Government please clarify whether Other Labor is intended to be included in the unit price calculation?	Attachment L-05 will be revised to clarify in the final RFP.
70	Attachment J-05; Section B	J-05 Tasks 35–36; Section B Non-proposed ODCs (fuel)	J-05 Tasks 35–36; Section B fuel exclusion	7	Tasks 35 and 36 reference "Work Task Nos. 34 or 35"; however, the buses are Tasks 33 and 34. In addition, the Section B fuel exclusion references pre-priced Tasks 33-37 and 67, while Attachment J-05 contains only 42 pre-priced tasks. Could the Government please clarify the intended task references and identify which pre-priced tasks are required to include fuel costs in their pricing?	Attachment L-05 will be revised to clarify in the final RFP.
71	Attachment L-06	All tabs	Formula cells	N/A (Excel)	About 1,728 formula cells in Attachment L-06 display #REF! errors. Will a corrected Attachment L-06 be issued?	Attachment L-06 will be revised to clarify in the final RFP.

72	Attachment L-05	OCE tab	L2:L3 (FY 2034)	N/A (Excel)	The FY 2034 Core and MSR OCE subtotals sum the FY 2035 column (M) instead of FY 2034 (L). Will this be corrected?	Attachment L-05 will be revised to clarify in the final RFP.
73	Attachment L-05	Blended FBLR Detail tab	Rows 14–18 (IDIQ block) vs. tab instruction 3.1	N/A (Excel)	The "Blended FBLR Detail" tab has an IDIQ Work block; however, Instruction 3.1 states that IDIQ labor is not to be included on this tab. Could the Government please clarify whether the IDIQ Work section should be left blank, or whether specific IDIQ-related data is intended to be entered in that portion of the workbook?	Attachment L-05 will be revised to clarify in the final RFP.
74	Attachment L-05	IDIQ Work tab	ALL-years summary rows 425–426	N/A (Excel)	The summary includes two transportation review/permitting tasks (BEQ 0). These tasks do not appear in Attachment J-05 or in any of the yearly rows. Could the Government please clarify whether these tasks are intended to be included in the pricing workbook? If not, should Offerors	Attachment L-05 will be revised to clarify in the final RFP.

					disregard these tasks for pricing purposes?	
75	Attachment L-05	DropDown tab	DropDown! A121	N/A (Excel)	The category 'Water & Waste Operator Mechanic' ends with a hidden line break, so it doesn't match exact-text entries. Will the list be corrected?	Attachment L-05 will be revised to clarify in the final RFP.
76	Attachment J-05	Pre-Priced Work Task #53-58	53-58		Could the Government please clarify whether these pre-priced estimates are intended to support NASA-managed projects, non-Core customers, or both?	Attachment L-05 will be revised to clarify in the final RFP.

77	Draft RFP Section M	Evaluation Factors for Award, Additional Information/Notes, FAR 52.212-2 EVALUATION-COMMERCIAL PRODUCTS AND COMMERCIAL SERVICES (NOV 2025) (DEVIATION)	(a)	p. 77	DRFP states "A trade-off process, as described in FAR 15.103-1, will be used in making source selection with respect to the Past Performance and Price factors." FAR 15.103-1 states, "The tradeoff approach to source selection is appropriate when it may be in the Government's best interest to consider award to other than the lowest priced offeror or other than the highest technically rated offeror. This process permits tradeoffs among cost or price and non-cost or non-price factors. The anticipated benefits of a higher priced proposal must merit the additional cost." Question: How will Past Performance be evaluated using FAR 15.103-1 when this area addresses tradeoffs between cost or price and non-cost or non-price factors? Which requirements will be used to determine the Past Performance rating, and what weight will each be given?	Please see Section M "Evaluation Factors for Award," and FAR 52.212-2 "EVALUATION-COMMERCIAL PRODUCTS AND COMMERCIAL SERVICES" (NOV 2025) (DEVIATION) (a) Evaluation factors.

78	Draft RFP, Section L	Volume 3 Price Instructions	(a)(3)	P. 64	The draft RFP states bidders must provide documentation that it has a material management and accounting system (MMAS). MMAS is not found in the FAR or NFS, but instead in the DFARS at 252.242.7004. MMAS requirements in the DFARS are geared much more toward manufacturing or production rather than the need for government and contractor property management typically required for base operations work. Given the scope of work on SIMO, we would expect that FAR requirements for government property at FAR 52.245-1, Government Property, to meet the Government's needs here (along with NASA's 48 CFR Part 1845, with the primary contract clauses at 1852.245-70 and 1852.245-71, governing how NASA-furnished property is requested, used, and accounted). Will the Government confirm it requires an MMAS rather	The Government confirms the requirement that the Offeror provide documentation that affirms that it has a material management and accounting system (MMAS). The MMAS does not have to be an approved system.

					than a property management system?	
79	Service Employees (SCLS/CBA)	L – Volume 3 Price Instructions	(a)(6) and (a)(7)	P. 64–65	The solicitation incorporates FAR 52.222-41 and FAR 52.222-43 and provides Wage Determinations in Attachment J-09. Can NASA confirm whether incumbent employees performing the SIMO requirements are covered by existing Collective Bargaining Agreements (CBAs)? If so, can NASA please provide the applicable current CBAs and all amendments, wage schedules, and other documents affecting employee wages and fringe benefits prior to the RFP release to support accurate proposal pricing?	CBAs and wage determinations will be posted as controlled documents for Offeror pricing and planning (see Attachment J-09 and SAM notice).

80	Non-propposed ODCs	L – Volume 3 Price Instructions	(a)(7)	p. 66	Section states that the Government-provided non-proposed ODC values are non-fee bearing and are not subject to direct application of general and administrative expenses, overhead, profit or any other direct or indirect costs. The Offeror may recover costs or fees associated with the supply of non-proposed ODCs via a direct cost, indirect cost, or other cost element (OCE) under Core Work and MSRs CLINs. Are Offerors allowed to assume that general and administrative expenses, overhead, profit or any other direct or indirect cost are covered in the Government-provided non-proposed ODC values?	No. Please see Section L Volume 3 Pricing Instructions, (c)(7).
81	Draft RFP, Section L	VOLUME 2 PAST PERFORMANCE INSTRUCTIONS	(d)(11)(i)	63 of 82	The instructions ask for "A summary of OSHA Form 300A". However, note 2 to the page limitations table (p. 72) says that the page limitation "Excludes OSHA's Form 300A." Does the Government want the form itself or only a summary of the form?	VOLUME 2 PAST PERFORMANCE INSTRUCTIONS (d)(11)(i) will be clarified in the final RFP.

82	Draft RFP, Section M	PAST PERFORMANCE EVALUATION		79 of 82	The draft RFP states that Past Performance will be evaluated " in accordance with FAR 15.202(c) and NASA FAR Supplement (NFS) Companion Guide (CG) 1815.23(d)". However, NFS CG 1815.23 does not appear to have a subsection (d). Should this refer to (c) instead?	Government confirmed the reference, no change.
83	Draft RFP, Section L	VOLUME 2 PAST PERFORMANCE INSTRUCTIONS	(e)(6)	63 of 82	"The draft RFP states, ""Average number of work-year-equivalents (WYE) on the contract and the average WYE directly performing work relevant in the areas described in paragraph (e)(9).""	The Offeror shall include: average number of work-year-equivalents (WYE) on the contract and the average WYE directly performing work relevant in the areas described in paragraph (e)(9).
84	Draft RFP, Section L	Volume 3 Price Instructions	(a)(3)	P. 64	The draft RFP references a Material Management and Accounting System (MMAS). Is the Agency intending for offerors to have a system consistent with DFARS 252.242.7004? If so, will the Agency confirm small businesses are exempt from this requirement consistent with DFARS 252.242.7004? If not, will the Agency provide clarity	The Government confirms the requirement that the Offeror provides documentation that affirms that it has a material management and accounting system (MMAS). The MMAS does not have to be an approved system.

					as to what it's requirement for the MMAS is and what documentation it requires for the MMAS?	
85	PWS	PWS 1.2.1	17	12	"PWS 1.2.1 paragraph 17 states ""Provide near real-time reporting via the Government contract management portal (reference PWS Section 4.6.1 No. 12)"". Should this requirement reference Section 4.6.1 No. 11 instead?	Attachment J-01 PWS will be revised to clarify in the final RFP.
86	Section L	Volume 3 Price Instructions	(b)(7)	65	The Volume 3 instructions direct the Offeror to "complete Attachment L-01, Minimum Staffing Requirements, consistent with its management and technical approach," but Attachment L-01 is a Government-established floor and is not identified as a submittal in Section L or in the NFS 1852.215-81 page limit table. Is Attachment L-01 to be submitted, in which volume, and in what form?	"Attachment L-03, Price Instruction (b) (7) will be revised for clarification in the final RFP. "

87	Section L	NFS 1852.215-81 Proposal Page Limitations	(c)	73	Paragraph (c) directs the Offeror to identify any exclusions to the page limits that are excluded from the page count and points back to 1852.215-81. As written the provision is circular and conveys no requirement. Will the Government state which items the Government excludes from the page counts? We recommend that front matter, including the cover page, table of contents, glossary, acronym list, and cross-reference matrix (if applicable), be excluded from page limits in all volumes.	Section L, NFS 1852.215-81 Proposal Page Limitations will be updated in the Final RFP.
88	Attch J-05 and PWS	Attch J-05; PWS Sections 1.8.4, 3.2.9.3 1.6.1.3 1.6.6 3.5.1 4.1.1 7.1.1	"Pre-priced IDIQ cost estimates and associated designs for modification projects 1.8.4 (paragragh 2) 3.2.9.3 (paragraph 5) 1.6.1.3 (paragraph	"32 97 24 & 25 27 110 & 111 113 155 "	"The draft RFP infers there will be engineering functions provided by the Contractor. For example, reference Attch J-05 (Pre-priced IDIQ cost estimates and associated designs for modification projects); PWS 1.8.4.2 (PE signature on environmental permits); PWS 3.2.9.3.5 (certifications of compliance by a Professional Engineer for environmental resource permitted stormwater	The labor classifications identified in Attachment L-02, Government SLCs and Qualifications, are sufficient to satisfy most of the core work requirements referenced in the question. Professional Engineering (PE) service requirements may be provided and priced as Other Cost Elements (OCE) in attachment L-05, Pricing Template.

			2) 1.6.6 3.5.1 4.1.1 (paragraph 8) 7.1.1 (paragraph 11)"		systems); PWS 1.6.1.3.2 (Submit system safety engineering analysis documentation); PWS 1.6.6 (Participation in KSC Electrical Safety Working Group meetings by ""NASA and Contractor representatives from Safety Engineering, Safety Specialists, Engineering, Electrical Design Engineering""); PWS 3.5.1 (preparation of CAD drawings and release of engineering orders); PWS 4.1.1 (perform engineering analyses); PWS 7.1.1.11 (""Provide engineering and engineering support services, as required, to support operations at Wallops Flight Facility."") Can NASA please provide the engineering labor categories and qualifications for these specific job descriptions?"	

89	Attachment J-01 PWS	7.1 .1 Requirements	7.1.1.7.b	154	"This states a requirment for the contractor to support Government managed construction work, including ""Prepare and submit partial and final M&O and real property turnover documentation (KSC Form 21-136, Turnover of M&O and/or Sustaining Engineering Responsibility for KSC Facilities, Systems, and Equipment; NASA Form 1046, Real Property Transfer and/or Notification of Acceptance of Accountability of RP; and Form DD 1149, Equipment List) within ten days of Government acceptance."") Given that the Government will have apaprently taken over all responsibility for construction management, inspection and related support setrvices, why is the SIMO contractor tasked with preparing turnover documentation for NASA managed construction projects? This would include significant technical content prepared by NASA-managed	The SIMO contractor must still receive, document acceptance of, and thereafter maintain, and operate the newly activated and turned over (assigned) FSEU. PWS 4.4 and the associated reference processes exist for that purpose.

					construction contractors and engineering service providers. Note that PWS 4.4.1.3 requires SIMO to ""Process and coordinate the distribution of completed M&O and real property turnover documentation for all core work, Contractor-managed TOs, Government-managed work, and other Contractor-managed projects...""""	
90	Attachment J-01 PWS	4.1.1 Requirements	4.1.1.5.a	113	Requirement is to "Incorporate all existing EOs on configured drawings/documents into new drawing/document revisions within two years of original EO release date. All exceptions shall be approved through the CCB." Will the Government provide the existing backlog of EOs, including their release dates?	Late EO releases (if any) will be considered on a case-by-case basis.

91	Attachment J-01 PWS	6.1.2 Maintenance	6.1.5	150	6.1.2.2 includes requirement that "The planners shall also attend the daily facility scheduling meetings and work with NASA Flow management to generate work orders in support of EGS operations," but 6.1.5 does not identify planners as required attendees at scheduling meetings. Please clarify as needed. Also, to allow for proper resource planning, will the Government identify approximate starting times for the daily meetings requiring attendance of the Operations Manager or delegated representative?	PWS 6.1.5 will be updated in the Final RFP to identify Planners as a required attendee.
92	Volume I	Contract Phase In	(a)(5)	60	"Q #1: Is this is the only requirement for inventory during Phase In, or must vehicles, materials, or non-ECN-tagged property listed in paragraph (a) also be inventoried before the contract effective date? How does this relate to NFS 1852.245-78? Q #2: Is this a Joint Inventory conducted with Government participation, and will the Government provide the incumbent's ECN property records at	The incumbent and successor contractors, in coordination with the KSC Supply & Equipment Management Officer, will complete a joint 100% physical inventory of all ECN tagged property, per Attachment J-10 "Government Furnished Property" - Tab "Equipment tagged" during phase-in. Attachment J-10 "Government Furnished Property" - Tab "Equipment tagged" includes ECN tagged vehicles furnished by the government and capital assets subject to NFS 1852.245-

					the start of Phase-In?	78, "Physical Inventory of Capital Personal Property." Materials and non-ECN tagged administratively controlled equipment (ACE) do not require a 100% physical inventory prior to contract start date. An updated copy of Attachment J-10 "Government Furnished Property" will be provided on the first day of phase in.
93	J Attachments	Attachment J-01, PWS	3.2.14.1 No. 5; 3.2.14.4 No. 2	107–108 of 169	The KSC SOCS Tech Exhibits included Tech Exhibit 3.2.14.3-1, Heavy Equipment Test Weights and Slings; the SIMO Tech Exhibits do not. Will the Government provide a listing of the slings to be load tested and identify the test weights (quantity, capacity, location) available as Government property for that testing?	The SIMO Tech Exhibit 3.1-2 "FSEU Asset Reference List" includes Heavy Equipment Test Weights and Slings.
94	J & L Attachments	Attachments J-01, PWS; Attachments L-01 and L-02	PWS 1.10.1 (4)	42 of 169	"PWS paragraph 1.10.1 (4) requires the contractor to provide a dedicated on-site Directorate Facility Utilization Manager. Attachments L-01 and L-02 do not list this position.	Please see Attachment L-02, "Government SLCs and Qualifications." PWS 1.10 "Facility Management" will be updated in the Final RFP. Appendix J01-1, the Glossary will be updated to define "dedicated." Yes. These hours are included in the Government's total minimum labor hours.

95	Attachment L-01, Minimum Staffing Requirement				"Question: Do hours worked by subcontractors count toward the L-01 minimum staffing hours, and may a subcontractor perform an entire labor category (for example, Driver, Medium or Fleet Manager)? Confirm in the Final RFP that subcontractor hours, including small business hours, count toward L-01 minimums. Otherwise offerors have an incentive to self perform and limit small business participation."	All hours proposed count toward the minimum staffing requirements.
96	Cover letter, p. 2 – Government property				Question: For the logistics scope, will NASA provide vehicles, warehouse space and material-handling equipment as government-furnished property, or must the contractor supply them? List the government-furnished property and facilities available for logistics functions in the Final RFP, including quantities and condition.	Attachment J-10 "Government Furnished Property" lists all government funished property that will be provided to the SIMO contractor, including vehicles and material-handling equipment. Attachment J-12 "Government Furnished Facilities" lists all government furnished facilities to be provided to the SIMO contractor, including warehouse space.

97	Logistics – HAZMAT handling				Question: Will the logistics scope include receipt, storage or transportation of hazardous materials? If so, which certifications and transportation requirements apply on KSC and CCSFS? Identify any HAZMAT logistics requirements and applicable KSC/CCSFS procedures in the Final RFP	Refer to Attachment J-01 "PWS," 1.8 "Environmental Management," 5.2 "Property Management," and 5.4 "Transportation Management."
98	Cover letter, p. 1 - Logistics scope				Please clarify the specific functions included within "logistics and related services for the Spaceport Integration (SI) organization." In particular, does this scope include supply and inventory management, warehousing and distribution, property/material	Refer to Attachment J-01 "PWS," Section 5.0 "Enterprise Logistics Services" and "SIMO Historicals" located in the Bidders Library.

					movement, transportation and freight coordination, receiving and shipping, or related logistics-management functions? Recomendation: Define the SI logistics scope and associated performance requirements in the Final RFP. Where available, provide historical workload indicators such as shipment volumes, transportation requests, receiving/shipping activity, warehouse transactions, and other relevant logistics workload data in the Bidders Library.	
99	Acquisition strategy - Defined small business work packages				The SIMO requirement combines facilities maintenance and operations requirements with logistics and related support functions. Will NASA's acquisition structure allow offerors to identify defined work packages or functional areas that can be performed by qualified small business subcontractors as part of the integrated SIMO solution? Recomendation: Consider	"Please refer to Section L, ""Other Proposal Instructions/Eligability Requirements"" (a) Small Business Participation. "

					structuring the Final RFP to encourage meaningful small business performance of defined functional areas, including logistics and related support services, while preserving the prime contractor's ability to integrate those functions within the overall SIMO requirement. Where appropriate, NASA could identify work packages suitable for small business subcontracting without requiring those functions to be separated from the overall acquisition.	
100	Attachment L-01, Minimum Staffing Requirements				Question: Do hours worked by subcontractors count toward the L-01 minimum staffing hours, and may a subcontractor perform an entire labor category (for example, IT Professional or Technical Writer)? Confirm in the Final RFP that subcontractor hours, including small business hours, count toward L-01 minimums. Otherwise offerors have an incentive to self-perform and limit	All hours proposed count toward the minimum staffing requirements.

					small business participation.	
101	DD 254 (Attachment J-15) – Classified work				Question: Will the classified portion of the work include IT systems or security documentation, and does the DD 254 permit cleared subcontractors to perform classified tasks? Describe the classified work categories in the Final RFP and confirm how the DD 254 flows down to cleared subcontractors.	The classified work will not include IT systems or security documentation. The tasks will not be classified but will be performed in classified areas and will require a clearance. The work will involve facility maintenance and repairs at a classified facility and will encompass all facility disciplines, excluding IT.
102	DRFP Sections A-M	Throughout	Throughout	All	The solicitation uses both integers (e.g., Volume 1) and with Roman Numerals (e.g., Volume I) when referencing proposal volumes. Could the Government please standardize the nomenclature to ensure consistency and clarity in the proposal	Sections A-M formatting will be updated in the Final RFP.

					requirements?	
103	DRFP Sections A-M	Page Limitations	1852.215-81 Proposal Page Limitations. (Apr 2015)	72	The Proposal Page Limitations table references "Data required for Artificial Intelligence Solutions" under Volume IV Plans and Other Data. However, Offerors are unable to locate this referenced section within the Draft RFP. Will the Government clarify the Data required for Artificial Intelligence Solutions, confirm there is no associated page limit, and provide the requested file format?	Provision 1852215-81 Proposal Page Limitations will be updated in the Final RFP.

104	DRFP Sections A-M	Section L	Contract Phase-In	56	Section L, Contract Phase-In (e) identifies ten DRDs for submission during the Phase-In period. However, the associated DRD attachments indicate that five of those deliverables (Risk Mgmt. Plan, OCI Avoidance Plan, Quality Mgmt Plan, Security Requirements for Unclassified IT Resources, and Logistics Support Plan) are due 60 days after contract award. As these due dates may extend beyond the 45-day Phase-In period, could the Government please clarify which DRDs are required to be submitted during Phase-In and confirm the applicable due dates for each deliverable?	Provision Contract Phase-in will be updated in the Final RFP.
105	DRFP Sections A-M	Page Limitations	1852.215-81 Proposal Page Limitations. (Apr 2015)	72	The page limitations table for Volume IV, Plans and Other Data, appears misaligned. Could the Government please clarify whether the 25-page limit applies to Position Descriptions and Qualifications or to the data required by NFS 1852.245-80 and NFS 1852.245-81?	Provision 1852.215-81 Proposal Page Limitations will be updated in the Final RFP.

106	DRFP Section A-M	Section L	1852.215-81 Proposal Page Limitations. (Apr 2015)	72	The Proposal Page Limitations table lists Staffing Plan Worksheets under Volume IV, Plans and Other Data; however, the solicitation appears to require these worksheets under Volume I, paragraph (c). Will the Government please clarify the intended volume for submission of the Staffing Plan Worksheets?	Provision 1852.215-81 Proposal Page Limitations will be updated in the Final RFP.
107	DRFP Section A-M	Attachment L-05,	MSRs Worksheet	NA	BEQ estimated annual number for the various MSR bands, as a percentage of the total MSRs, varies significantly from the percentages provided in the Sources Sought and historical workload data. For example, MSR001 accounted for 14% of the work orders in the Sources Sought and only 11% in the DRFP Attachment L-05. Could the Government please clarify the intent of the historical and forecast percentages provided in the various documents and the basis for the differences between them?	The intent of the historical percentages is to provide Offerors past actual data. The intent of the BEQs is to provide the Government's best estimates of future utilization.

108	DRFP Section A-M	Section L, Volume II	(d)	62	Could NASA provide additional clarification or examples of what constitutes contracts “similar in size, content, and complexity” to this solicitation? Specifically, does the Government have a minimum threshold of complexity for work involving hazardous operations or high-volume maintenance activities? For instance, what would constitute “high volume” for activities such as HVAC or elevator maintenance under L(d)(3)(G)?	The Government will conduct its past performance assessment in accordance with FAR 15.202(a) and NASA FAR Supplement (NFS) Companion Guide (CG) 1815.23(d).
109	DRFP Section A-M	Section H	Price Adjustments	24-26	Could the Government please clarify how fluctuations in material and commodity costs, such as steel and fuel, will be handled during contract performance? Are contractors expected to absorb all cost increases, or are there provisions for equitable adjustment when significant, unforeseeable cost escalation occurs?	Please refer to Section B "Non-Proposed Other Direct Costs (ODCs)."

110	DRFP Section A-M	Section L Volume I	Key Personnel Requirements	60	For the required Phase-In key positions, does the Government require each role to be filled by a dedicated full-time individual, or is role consolidation (dual-hatting) permissible when the Offeror can demonstrate that all phase-in responsibilities will be effectively performed?	Key positions within the Offeror's phase-in team must include, at a minimum, the following, full-time position(s): Phase- in Manager, Program Manager, IT Professional, Logistics Manager, and Business Analyst (reference Attachment L-02, Government Standard Labor Categories and Qualifications).
111	DRFP Sections A-M	Page Limitations	1852.215-81 Proposal Page Limitations. (Apr 2015)	72	The Proposal Page Limitations table does not identify a page limitation or file format requirement for Volume V, Model Contract. Will the Government please provide the applicable page limitations and file format requirements for Volume V submissions?	Provision 1852.215-81 Proposal Page Limitations will be updated in the Final RFP.
112	DRFP Sections A-M	Page Limitations	1852.215-81 Proposal Page Limitations. (Apr 2015)	72	The Proposal Page Limitations table on Page 72 references Management Approach and Technical Approach sections; however, no corresponding proposal instructions appear in Section L. Will the Government	Provision 1852.215-81 Proposal Page Limitations will be updated in the Final RFP.

					clarify the associated proposal requirements for these sections?	
113	PWS 3.0 FSEU Maintenance and Operations	System-Specific Qualifications	3.2.2.2.5	32	The PWS requires the Contractor to "ensure at least eight technicians possess and maintain security clearance." Could the Government please clarify the required clearance level and identify the technician labor category(ies) or craft(s) to which this requirement applies?	The PWS will be updated in the Final RFP to clarify. The Government's intent is to ensure adequate labor categories/crafts to provide M&O support to facilities requiring Top Secret/SCI clearance.
114	PWS 3.0 FSEU Maintenance and Operations	System-Specific Operations	3.2.9.3.2	96	The PWS states that operational cleaning of ten miles of ditch centerlines per year shall be performed "as recommended by the previous year's engineering assessment and approved by the COR or TMR." Will the Government provide the most recent engineering assessment to support Offerors' understanding of the anticipated scope and distribution of work?	The Government's annual engineering assessment identifies the location of the work only, the scope is always 10 miles.

115	PWS 3.0 FSEU Maintenance and Operations	3.0 FSEU General Preventative Maintenance	3.1.3.1(a)	70	The referenced section contains two paragraph "(a)" designations. Could the Government please correct the numbering?	Government confirmed the reference, no change.
116	PWS 3.0 FSEU Maintenance and Operations	3.0 FSEU General Preventative Maintenance	3.1.3.1.a second "a"	70	The PWS requires the Contractor to evaluate trending data and provide recommendations regarding maintenance requirements, frequencies, and equipment replacement or repair to the SHARP Team. Could the Government please clarify the delineation of responsibilities between the SIMO Contractor and NASA Engineering for the analysis, recommendation development, approval, and implementation of maintenance strategy changes?	The Contractor supplies operational and condition-based inputs to SHARP. NASA engineering provides engineering authority, including validation of analyses, approval of proposed changes, and direction for implementation.

117	PWS 3.0 FSEU Maintenance and Operations	3.2.2.2 System-Specific Qualifications	3.2.2.2.1	76	Section 3.2.2.2.1 requires that "Journeyman Electricians perform operations and services on the electrical distribution system." Could the Government please define the term "electrical distribution system" as used in this requirement, including the systems, facilities, and equipment intended to be covered by this definition?	As used in PWS Section 3.2.2.1, the term“electrical distribution system” refers to the facility-level and site-wide electrical power distribution infrastructure that the Contractor is responsible for operating, maintaining, and supporting on assigned FSEU. This includes high-voltage, medium-voltage, and low-voltage distribution systems as defined in Appendix J-01-01, the Glossary.
118	PWS 3.0 FSEU Maintenance and Operations	3.2.2.2 System-Specific Qualifications	3.2.2.2.1	76	Could the Government please clarify whether the "electrical distribution system" referenced in Section 3.2.2.2.1 includes 13.8 kV and 115 kV lines or systems?	The Contractor is responsible for the portions of the 115 kV system located inside the Orsino and C-5 switchyard boundaries, including the associated 115 kV breakers and yard-level equipment, whereas the 115 kV transmission lines external to those yards remain Florida Power & Light (FPL) responsibility. SIMO is responsible for the 13.8 kV distribution system where it is part of the assigned FSEU.

119	DRFP Amendment L-01 Min. Staff Reqs	Summary Tab	Summary Tab	Table	Will labor category Logistics Specialist, CDL-A HAZMAT Driver referenced in the IAM CBA be added to the Amendment to ensure pricing of Core and MSR work are consistent?	The Final RFP will be updated to add this Labor Category.
120	Attachment L-05	Prime / SubK Labor Detail tabs	Rate columns FY 2028–FY 2035; Section L (a)(6); Pricing Instruction 12	N/A (Excel)	The pricing template applies a 3% annual escalation to all labor rates, including CBA and Wage Determination labor classifications. However, Section L indicates that CBA and Wage Determination rates are not to be escalated. Could the Government please clarify whether Offerors may overwrite the template formulas and enter year-specific rates for these labor classifications? If so, will the pricing template be revised to align with the requirements of Section L?	The L-05 "Fixed Price Template" will be updated to align with Section L instructions in the Final RFP.

121	Section L / Attachment L-05	Vol. 3 (c)(4)(i); L-05 Labor Allocations tab	Labor Allocations cols D and I	61	Section L excludes PWS Section 5 support from the support-labor allocation test, but the L-05 Labor Allocations check includes all support hours. Which scope governs?	L-05 "Fixed Price Template" will be updated to address this issue in the Final RFP.
122	Attachment L-05	Labor Allocations tab	Col D (Core Work SLINs 118–121)	N/A (Excel)	The support-hours check removes Core support hours on SLINs 118–121 (PWS 5.1–5.4) but keeps all MSR support hours. Is this intended? Where should PWS Section 5 support hours be priced?	L-05 "Fixed Price Template" will be updated to address this issue in the Final RFP.
123	Section L / Attachment L-05	Section L (b)(5); L-05 all tabs	Prime/SubK rows 2–3; Pricing Instructions cols E:F; Cover Page and DropDown sheets	65	L-05 arrives with hidden rows, columns and sheets, but Section L (b)(5) says submitted templates shall not contain hidden cells. Should offerors unhide them?	No.This is an intentional part of the template.

124	Attachment L-01	Summary tab	Whole tab	N/A (Excel)	Section L, Volume 3 Price Instructions (b)(7) states, "The Offeror shall complete Attachment L-01, Minimum Staffing Requirements, consistent with its management and technical approach to execute requirements." L-01 has no marked offeror input cells. How should offerors complete it (e.g., proposed hours by year and X marks by CLIN), and may offerors mark disciplines in CLINs the Government did not mark?	Attachment L-03, Price Instruction (b) (7) will be revised for clarification in the final RFP.
125	Attachment L-02 / J-08	L-02 'SIMO' tab; J-08	SLC list; key personnel	N/A (Excel)	Attachment J-08 appears to contain only a cover page, and Attachment L-02 does not include SLCs for several PWS-required roles (e.g., CIH, Florida PE, Energy Manager, Cybersecurity, GIS, and Maximo Administrator). Could the Government please clarify whether J-08 will be populated and identify the SLCs Offerors should use for these roles?	Attachment J-08 will be removed from the Final RFP. Attachment L-02 "Government SLCs and Qualifications" will be updated in the Final RFP.

126	Section B / Section L	Section B Non-proposed ODCs (b); Section L Vol. 3 (c)(7)	ODC handling cost recovery	6; 66	Section B states that ODC-related costs are recovered in Core, while Section L states that ODC-related costs are recovered in Core and MSRs. Could the Government please clarify the intended pricing approach and identify which CLIN(s) should carry ODC procurement and handling costs?	Non-proposed ODCs are applicable to both the Core and MSR areas.
127	Attachment J-01 PWS	2.1.1.4 Mission Support and Planning	2.1.1.4.5	50-51	The PWS requires the Contractor to develop decision packages for integrated SHARP top-priority new repairs over $25,000 and deferred maintenance requirements for evaluation at the Work Evaluation Board (WEB). Could the Government please clarify the respective roles and responsibilities of the SIMO Contractor and NASA Engineering in the development of these decision packages?	The Contractor compiles condition data, develops preliminary recommendations, and prepares the documentation needed to support NASA decision processes. NASA Engineering conducts the technical evaluation; validates recommendations; determines the appropriate maintenance strategy; and approves and directs implementation of any changes.

128	Attachment J-01 PWS	2.1.6 Meetings	2.1.6	53	The Core Work Integration requirement includes presenting the completion status of Pressure Vessels and Pressurized Systems (PVS) periodic inspections. Could the Government please clarify whether PVS periodic inspections are a SIMO Contractor responsibility or a NASA responsibility and, accordingly, what information the SIMO Contractor is expected to provide during these meetings?	The Contractor is responsible for performing the periodic inspections prescribed by each Pressure Vessel or Pressurized System (PVS) certification, and for maintaining accurate PVS operating and inspection records. NASA, through its PVS Certification Program and Pressure Systems Manager, is responsible for developing, issuing, and maintaining the PVS certifications, including the required inspection types, intervals, and any engineering evaluations that establish the certification basis.
129	Attachment J-01 PWS	2.1.6 Meetings	2.1.6	54	For the meetings identified in Section 2.1.6 where the Contractor's role is defined as "Participate," could the Government please clarify the specific responsibilities and expected level of support to be provided by the Contractor?	Please see "Participate" defined in the Appendix J-01-01 Glossary System Descriptions and Acronym

130	Attachment J-01 PWS	2.2 Maintenance Support Processing	2.2.1.2.1(c)/ 2.2.1.3.2(c)	59	The PWS states that recategorizations requested after repair work is complete will not be approved and that any Contractor-performed work beyond the assigned MSR work category without Government-approved escalation will be provided at no additional cost to the Government. Could the Government please clarify the process to be followed when work is halted pending category validation or escalation approval and the Government subsequently does not approve closure of the work order within the originally assigned MSR category?	Attachment J-01 "PWS" will be updated to clarify category validation process for the Final RFP.
131	Attachment J-01 PWS	3.1 Requirements for all FSEU	3.1.1.11	69	The PWS states that the Contractor shall support the NASA Systems Engineer by submitting EWRs. Could the Government please clarify the Contractor's role in the EWR process, including responsibility for EWR preparation, submission, tracking, and closure, versus the responsibilities of NASA Systems	Please see Tech Exhibit 2.0-1, Reference Documents Process Charts. NASA Engineering retains full responsibility for performing engineering evaluations, determining corrective actions, approving configuration changes, and issuing technical direction.

					Engineering?	
132	Attachment J-01 PWS	3.3 Meetings	3.3	109	The requirement states that the Contractor shall participate in SHARP Team meetings and "review, analyze and report on the health and readiness of assigned FSEU," "recommend corrective actions," and "propose work and changes in maintenance requirements." Could the Government please clarify the respective roles and responsibilities of the SIMO Contractor and NASA Engineering with regard to technical evaluations, corrective action recommendations, and proposed changes to maintenance requirements discussed during SHARP Team meetings?	The Contractor supplies operational and condition-based inputs to SHARP. NASA engineering provides engineering authority, including validation of analyses, approval of proposed changes, and direction for implementation.

133	Attachment J-01 PWS	3.3 Meetings	3.3	109	For the Engineering Review Board (ERB), could the Government please clarify whether the SIMO Contractor is expected to brief TAL 2 and TAL 3 events and present technical assessments, or whether the Contractor's role is limited to providing supporting data, meeting administration, documentation, and action tracking in support of NASA Engineering?	Contractor support of the Engineering Review Board (ERB) also includes providing field insights, observations, and relevant system-level context during NASA Engineering's investigations of Technical Anomaly Level (TAL-2 and TAL-3) events.
134	Attachment J-01 PWS	4.1.1.3 Pressure Vessel Systems	4.1.1.3	116	The requirement references the completion status of Pressure Vessels and Pressurized Systems (PVS) periodic inspections. Could the Government please clarify whether PVS inspections and inventory activities are performed by NASA personnel and, if so, define the SIMO Contractor's role in supporting, tracking, and reporting these activities?	The Contractor is responsible for performing the periodic inspections prescribed by each Pressure Vessel or Pressurized System (PVS) certification, and for maintaining accurate PVS operating and inspection records. NASA, through its PVS Certification Program and Pressure Systems Manager, is responsible for developing, issuing, and maintaining the PVS certifications, including the required inspection types, intervals, and any engineering evaluations that establish the certification basis.

135	Attachment J-01 PWS	4.1.1.1 Audits of existing systems and Equipment	4.1.1.1(f)	115	Section 4.1.1.1(f) requires that audits be performed by "appropriate Contractor Systems and Equipment Operations and Maintenance personnel." Could the Government please clarify the qualifications, certifications, experience, or labor categories that would be considered appropriate to perform these audits?	PWS section 4.1.1.1(f) was updated to require that audits be performed only by Contractor personnel who meet the PWS-mandated qualifications for the systems they operate and maintain, rather than by any generalized or administrative staff.
136	Attachment J-01 PWS	4.4 Activation and Turnover Requirements	4.4.1.4	124	Could the Government please clarify the Contractor's responsibilities for preparing a Facility Abandon Status Transition (FAST) assessment? Specifically, what portions of the assessment are expected to be developed by the SIMO Contractor versus other Government personnel or organizations?	Please see Tech Exhibit 2.0-1, Reference Documents Process Charts. NASA Engineering retains full responsibility for performing engineering evaluations, determining corrective actions, approving configuration changes, and issuing technical direction.

137	Attachment J-01 PWS	4.4 Activation and Turnover Requirements	4.4.1	124	Section 4.4.1 contains multiple references to engineering-related responsibilities. Could the Government please clarify the respective roles and responsibilities of the SIMO Contractor and NASA Engineering for these activities?	Please see Tech Exhibit 2.0-1, Reference Documents Process Charts. NASA Engineering retains full responsibility for performing engineering evaluations, determining corrective actions, approving configuration changes, and issuing technical direction.
138	Attachment J-01 PWS	4.5 GIS, Site Planning, Excavation and Survey Support	4.5	125	Section 4.5 includes requirements related to GIS and Site Planning activities. Could the Government please clarify the level of support expected from the SIMO Contractor and identify which GIS and Site Planning functions are intended to be performed by the SIMO Contractor versus NASA personnel?	Please see Tech Exhibit 2.0-1, Reference Documents Process Charts. NASA retains responsibility for performing all authoritative site planning analysis, final GIS data governance, long-range development planning, mission integration assessments, and approval of any geospatial products or planning recommendations that may affect Center configuration or technical baselines.
139	Attachment J-01 PWS	4.5 GIS, Site Planning, Excavation and Survey Support	4.5.1.2	125	Could the Government please clarify the meaning of "legal descriptions" within Section 4.5.1.2? Specifically, are Offerors expected to provide support related to leases and easements?	"Legal descriptions" is a common term in the land surveying profession.

140	Attachment J-01 PWS	4.5.2 Qualifications	4.5.2.1	126	Section 4.5.2 states, "Land surveyors shall be State of Florida licensed." Could the Government please clarify whether this requirement applies to all land surveyors performing work under the contract or whether it is sufficient for the Contractor to maintain at least one State of Florida licensed land surveyor responsible for oversight and certification of surveying activities?	Please see Attachment L-02, Government SLCs and Qualifications; "Land Surveyors" and "Surveyor Technicians". PWS 4.5.2 will be updated in the Final RFP.
141	Attachment J-01 PWS	4.5.5 Reporting	4.5.5.2	127	Section 4.5.5.2 requires legal descriptions to support new and existing Center agreements. Could the Government please clarify the types of agreements included within this scope and whether support is required for agreements involving commercial partners, utility providers, and other non-NASA entities operating at KSC?	The type of agreement is inmaterial to the requirements of PWS 4.5.5.2.
142	Attachment J-01 PWS	6.1.2 Maintenance	6.1.2.1(a)	150	Section 6.1.2.1(a) requires support for Verification and Validation (V&V) events, including testing associated with redesign efforts resulting from launch damage. Could the Government please clarify the SIMO	Please see the CUI documents identified in J-01 "PWS" Section 6.1.2.1, which are available through Sam.gov.

					Contractor's expected role in these activities?	
143	Attachment J-01 PWS	8.0 Data Requirements	8	157-158	DRD1.10-1 and DRD4.3-01 appear to be duplicative KSC Real Property Report requirements. Could the Government please clarify whether both deliverables are required and, if so, identify any differences between the two reporting requirements?	The Government confirms unintentional duplication, the DRDs will be updated in the Final RFP.
144	Attachment J-01 PWS	9.0 Performance Standards	9.32-33	163	PWS Performance Standards 32 and 33 require the Contractor to submit a TAL corrective action EWR within 5 days of TAL closure statement completion and complete TAL corrective actions within 30 days of EWR approval or per the approved MSR schedule. Could the Government please clarify the Contractor's responsibility for meeting these timelines when	Attachment J-01 "PWS" Section 9.0, "Performance Standards" will be updated in the Final RFP to clarify that Government delays will be considered when calculating contractor compliance.

					TAL classification, closure statements, corrective action determinations, and approvals require NASA review and involvement? Additionally, how will performance be assessed when schedule impacts result from actions or decisions outside the Contractor's control?	
145	Attachment J-01 PWS	9.0 Performance Standards	9.34	163	The required timelines for Configuration Control of System Drawings and Documents Changed by Core Tasks may be dependent upon reviews, approvals, and actions external to the Contractor. Could the Government please clarify the extent to which the Contractor will be held accountable for meeting these performance standards when delays result from actions outside the Contractor's control, including Government reviews, approvals, or processing activities?	Attachment J-02, Deduction Schedule has been updated to add the following condition: "Government delays will be considered when calculating timeframes."

146	Attachment J-01 PWS	9.0 Performance Standards	9.37	164	The Space Utilization performance standard states that the walkdown requirement does not include outgrant facilities. Could the Government please define "outgrant facilities"?	Outgrant facilites are facilities that are owned by NASA and leased to another entity for use (e.g., SLC-39A to SpaceX). Appendix J-01-01 Glossary System Description and Acronyms will be updated for the Final RFP.
147	Attachment J-01 PWS	9.0 Performance Standards	9.39-40	164	The Partial Final Turnover and Final Turnover performance standards reference completion of "M&O Turnover documentation." Could the Government please clarify the specific documentation included within this requirement and what constitutes completion for performance measurement purposes?	Please see PWS Section 4.4, Activation and Turnover, which provides examples of the records, plans, drawings, status information, and other turnover products required to support facility and system turnover activities.
148	Attachment J-01 PWS	9.0 Performance Standards	9.41-46	164-165	Performance Standards 41-46 are grouped under "GIS, Site Planning, Excavation, and Survey Support Services". Could the Government please clarify the level of GIS and Site Planning support expected from the SIMO Contractor and identify which activities are intended to be performed by the Contractor versus NASA personnel?	Please see Tech Exhibit 2.0-1, Reference Documents Process Charts. NASA retains responsibility for performing all authoritative site planning analysis, final GIS data governance, long-range development planning, mission integration assessments, and approval of any geospatial products or planning recommendations that may affect Center configuration or technical baselines.

149	Attachment J-05	Pre-Priced Work Task #43-50	43-50		Multiple launch support tasks indicate that they may be "stacked" with single technician line items and when additional duration or shifts are required. Could the Government please clarify the intended meaning of "stacked"	"Stacked" means a particular pre-priced work task may be supplemented with additional same type pre-priced work task(s) to achieve a cumulative requirement. Appendix J-01-01 "Glossary System Description and Acronyms" will be updated for the Final RFP.
150	Attachment J-05	Pre-Priced Work Task #40-41	40-41		Surveying and Agreement Support, Licensed Surveyor and Surveying and Agreement Support, Excavation Permit Inspector or Survey Technician are priced on an 8-hour support basis; however, it is unclear whether these tasks are intended to support work during normal business hours only or whether pricing must account for 24-hour/7-day availability and response. Could the Government please clarify the expected availability requirements associated with these pre-priced tasks?	Attachment J-05 "Pre-Priced IDIQ Work Catalog" will be updated for the Final RFP.

151	DRD 3.2.12-02	Traffic Control Devices Inspection Report	J01-04	2	Could the Government please clarify the SIMO Contractor's responsibilities for performing inspections, inventories, and condition assessments required by DRD 3.2.12-02, including any required coordination, technical review, or approval by NASA personnel?	Please see PWS Section 3.2.12.3 for System-Specific Operations requirements.
152	Attachment J-01 PWS	2.2.1 MSR Requirements	2.2.1.9	58	Does the restriction on generating separate MSRs for support work also apply to PM-related support requirements, such as scaffolding?	Yes.
153	Attachment J-01 PWS	2.2.1.2 Repairs	2.2.1.2.6	60	The requirement states that all repair work shall be warranted against defects in materials and workmanship for one year. For obsolete equipment requiring rebuilt, refurbished, or remanufactured parts that may not carry a manufacturer warranty, will the Government clarify the Contractor's warranty obligation and identify any allowable	In accordance with PWS 2.2.1.2 paragraph 6, repairs involving obsolete equipment where new replacement parts are unavailable and rebuilt; refurbished; remanufactured; or otherwise non-OEM parts must be utilized, the Contractor shall provide the maximum warranty available from the supplier or manufacturer and remain responsible for defects in Contractor workmanship associated with the repair for one year. There are no allowable

					exceptions to the one-year warranty requirement?	exceptions.
154	Attachment J-01 PWS	Performance Standard 36 and 37	36, 37	164	The performance metrics for Facility Space Utilization and SSMT Updates of Personnel require walkdowns of 25% of NASA-owned and occupied facilities annually, with the intent to survey all facilities within a four-year period. Will the Government clarify whether these walkdowns are required for all NASA-owned and occupied facilities at KSC, including facilities that are managed, operated, or maintained under other contracts?	These walkdowns are required for all NASA-owned and occupied facilities at KSC. This requirement does not apply to outgranted facilities as defined in the Final RFP Glossary.

155	Attachment J-01 PWS	Performance Standard 38	38	164	Performance Standard 38 requires the Contractor to identify, create, and submit draft documents for NASA HQ-required submittals at least 30 days prior to their due date. Will the Government please identify the specific documents included in this requirement? Additionally, please clarify the expected content, format, frequency, responsible NASA organization, and historical submission schedule for each HQs-required deliverable so offerors may accurately assess the level of effort and staffing required for performance.	Please refer to Attachment J-01 "PWS" Section 4.3.5 which reads "Integrate and provide input for the annual FRPP space utilization call as summarized in the annual Building Space Utilization Report (i.e., the 1400 Report, Maintenance and Operations (M&O) Report, and Space Utilization Summary)." The Building Space Utilization Report is in excel template format.
156	Attachment J-01 PWS	System-Specific Reporting	3.2.3.6.1 (a, b, c)	82	PWS Section 3.2.3.6 requires the Contractor to develop, update, and maintain a near real-time Fire and Protective Systems Maintenance Report containing equipment manufacturer, installation date, model number, PM information, equipment identification number, configured drawing number, and SPA number. Will the Government clarify whether Maximo is the	Maximo is the intended system of record for developing, updating, and maintaining this information, and Maximo currently contains most of the data elements required to produce the report. The Contractor will be responsible for developing and populating the missing information.

					intended system of record for collecting and maintaining this information, and whether Maximo currently contains all data elements required to produce the report? If any required information is not currently maintained within Maximo, please identify the expected source(s) of the data and clarify whether the Government will provide existing records or if the Contractor will be responsible for developing and populating the missing information.	
157	Attachment J-01 PWS	Power Systems and Lightning Protection, System-Specific Qualifications	3.2.2.2 (2, 4)	76	Will the Government clarify the basis for the "Journeyman level" requirement and the specific qualifications or credentials that will be accepted to demonstrate compliance?	Please see PWS Section 3.2.2.2-4.

158	Attachment J-01 PWS	Fire and Protective Systems, System-Specific Qualifications	3.2.3.2.1	78	Will the Government permit incumbent personnel with substantial TSS maintenance experience, but who do not possess an associate degree in Electronics or IMSA Level I certification, to satisfy this requirement through an experience-based equivalency? If not, please identify the timeline by which existing personnel must obtain the required credentials.	Experience only equivelency will not be permitted for system-specific qualifications. PWS Section 3.2.3.2 will be updated to reflect a timeline by which personel must attain credentials in the Final RFP.
159	Attachment J-01 PWS	Fire and Protective Systems, System-Specific Qualifications	3.2.3.2.2	79	Will the Government consider equivalent EPACS experience in lieu of the associate degree in Electronics requirement? If not, please clarify whether existing personnel who currently perform these functions but do not possess the required degree must meet this qualification upon contract commencement or if a phase-in period will be permitted.	Experience only equivelency will not be permitted for system-specific qualifications. PWS Section 3.2.3.2 will be updated to reflect a timeline by which personel must attain credentials in the Final RFP.

160	Attachment J-01 PWS	Fire and Protective Systems, System-Specific Qualifications	3.2.3.2.3	79	Will the Government consider demonstrated fire alarm system maintenance experience as an acceptable equivalent to the associate degree requirement? If not, please clarify whether incumbent personnel who currently perform these functions but do not possess the required degree or certification must meet these qualifications upon contract commencement or if a phase-in period will be allowed.	Experience only equivelency will not be permitted for system-specific qualifications. PWS Section 3.2.3.2 will be updated to reflect a timeline by which personel must attain credentials in the Final RFP.
161	Attachment J-01 PWS	Fire and Protective Systems, System-Specific Qualifications	3.2.3.2.4	79	Will the Government confirm that programming and configuration changes for Simplex ES, Siemens MXL, Siemens FireFinder, and CRMS are within the Contractor's scope of responsibility and not a Government-performed engineering function? If these activities are Contractor responsibilities, please clarify the expected extent of programming, software administration,	Please see PWS Section 3.2.3.2-4 for qualification requirements. NASA Engineering retains full responsibility for performing engineering evaluations, determining corrective actions, approving configuration changes, and issuing technical direction.

					and configuration management support required during contract performance.	
162	Attachment J-01 PWS	HVAC and Compressed Air, System-Specific Requirements	3.2.4.2 (1, 2, 5)	84	Will the Government clarify the basis for the "Journeyman level" requirement and the specific qualifications or credentials that will be accepted to demonstrate compliance?	Please see PWS Section 3.2.4.2
163	Position Descriptions and Qualifications Staffing Plan	L, VOLUME 1 TECHNICAL ACCEPTABILITY M, Technical Acceptability Evaluation	(C)(5) (c)(iii)	P. 61 p. 79	Section L, Volume 1 Technical Acceptability Instructions, paragraph (c)(5), states that Offerors may utilize the descriptions and qualifications in Attachment L-02, Government SLCs and Qualifications, as appropriate. Section M states that position descriptions and qualifications will be evaluated for feasibility and for meeting the	Confirmed.

					minimum qualification requirements delineated in Attachment J-01, PWS. Can NASA confirm that the descriptions and qualifications identified in Attachment L-02 are mandatory minimum requirements for an Offeror's proposed labor classifications, provided each proposed labor classification is mapped to a corresponding Government SLC and meets all applicable minimum qualification requirements identified in Attachment J-01, PWS?	
164		L, VOLUME 1 TECHNICAL ACCEPTABILITY M, Technical Acceptability Evaluation	(C)(5) (c)(iii)	P. 61 p. 79	Section L, Volume 1 Technical Acceptability Instructions, paragraph (c)(5), states that Offerors may utilize the descriptions and qualifications in Attachment L-02, Government SLCs and Qualifications, as appropriate. Section M states that position descriptions and qualifications will be evaluated for feasibility and for meeting the minimum qualification	Yes.

					requirements delineated in Attachment J-01, PWS. Are offerors required to propose PDQs that meet the minimum requirements specified in both documents?	
165	Attachment L-01 Minimum Staffing Requirements	Attachment L-01 Minimum Staffing Requirements			Numbers and dollars are shown in lines 7, 8 , and 9. Can the Government provide detail as to what these numbers and dollars represent?	The Government was unable to locate the referenced numbers and dollars in Attachment L-01 "Minimum Staffing Requirements."
166	Draft RFP, Section H - Special Contract Requirements	Task Order Procedure	(c)(2)	29 of 83	The DRFP states "The Contractor's proposal shall include a schedule that identifies all time required for performance of the work including material procurement and delivery, a detailed line-item breakdown of each type of direct labor hours required, testing and inspection, and documentation close out. The schedule shall graphically show (i.e., GANTT chart) and list the timeline of the entire	The Section H Clause "Task Order Procedure" applies to requests for task plans that may be issued during contract administration. No task plans are being requested with this RFP.

					period of performance, start and completion of each task (milestones) contained in the proposal, and other information deemed pertinent in the proposal." Question: Can the Government clarify that this schedule covering "each task" across the "entire period of performance" actually needs to be included in this SIMO proposal? And, if so, in which Volume does it belong?	
167	Draft RFP, Section L	OTHER PROPOSAL INSTRUCTIONS/ELIGIBILITY REQUIREMENTS	B (6)	73 of 82	Can the Government please confirm that government documents (e.g., SF30s, SF33s, or RFP document fill-ins (such as Reps and Certs)) should not be altered except to fill in required information?	Confirmed.

168	Draft RFP, Section L	OTHER PROPOSAL INSTRUCTIONS/ELIGIBILITY REQUIREMENTS	8 c	73 of 82	Will the government confirm that offerors may include a cover page, table of contents, and list of figures and tables for all volumes that are excluded from any given page limitations?	Provision 1852.215-81 Proposal Page Limitations will be updated in the Final RFP.
169	Draft RFP, Section L	OTHER PROPOSAL INSTRUCTIONS/ELIGIBILITY REQUIREMENTS	B (7)	73 of 82	Will the government allow a 10pt font size for Tables? This will allow better readability of tabular information.	No change.
170	Draft RFP, Section L	OTHER PROPOSAL INSTRUCTIONS/ELIGIBILITY REQUIREMENTS	8 c	73 of 82	Will the Government allow a glossary of acronyms and abbreviations to be excluded from page count?	Provision 1852.215-81 Proposal Page Limitations will be updated in the Final RFP.

171	Draft RFP, Section L	Volume 1 Technical Acceptability Instructions	(d)(2)	P. 62	The draft RFP states, "...to include clearly identifying and describing the use of technology, automation, and systems." Can NASA please clarify what specific systems the PWS sections are referring to and if those systems are provided by NASA or need to be developed by the bidder?	It is the contractor's responsibility to identify and describe the use of technology, automation, and systems they will use to meet the PWS sections identified in Volume 1, Technical Acceptability Instructions (d)(2).
172	Tech Exhibit 4.6-1 SIMO Managed Applications	Legacy Applications Available Tab			Of the project management and scheduling tools listed, which are bidders required to use? Will project management remain part of the scope of SIMO and not in-sourced to civil servants?	The applications listed are available to meet PWS requirements but are not required. Project Management remains a SIMO responsibility.
173	Tech Exhibit 4.6-1 SIMO Managed Applications	Reference Data Applications Tab	Row 14		Row 14 states 800 licenses for Maximo. How many licenses are allocated to the SIMO contractor? Does this include all additional modules provided by the Government for Maximo? If so, what modules are included for use by the SIMO contractor?	The licenses and modules in Tech Exhibit 4.6.1 that are needed to perform contract requirements are Government-provided to the SIMO Contractor.

174	Draft RFP, Section L	Volume 1 Technical Acceptability Instructions	(a)(2)	P. 60	The draft RFP states "...develop and roll out the Government contract management portal". Does the portal already exist and will it be provided to the awardee? If not, what are the detailed requirements for the content, format, hosting, and interfaces of the portal?	The Government contract management portal already exists and will be provided to the awardee. Final RFP will be revised to clarify.
175	Tech Exhibit 4.6-1 SIMO Managed Applications	Legacy Applications Available Tab	Row 5		For all applications listed that are not hosted by the government, are bidders required to procure and host on company assets? If the application is not COTS, does the government provide that application?	Please see J-01 "PWS" Section 4.6.1 "Information Technology" No. 10.
176	PAST PERFORMANCE EVALUATION		Paragraph #1	79 of 82	"The past performance evaluation is an assessment of the Government's confidence in the Offeror's ability to perform the solicitation requirements. The Government will conduct its past performance assessment in accordance with FAR 15.202(c) and NASA FAR Supplement (NFS) Companion Guide (CG) 1815.23(d)." We are unable to locate FAR	The Government will update 52.252-2 "Clauses Incorporated by Reference" to revise hyperlinks in the Final RFP.

					15.204(c) and NFS CG 1815.23(d). Can the Government please provide updated information?	
177		PAST PERFORMANCE EVALUATION		79 of 82	The draft RFP states that Past Performance will be evaluated "in accordance with FAR 15.202(c) and NASA FAR Supplement (NFS) Companion Guide (CG) 1815.23(d)". Will the Government please confirm the applicable Companion Guide edition and whether 1815.23(c) was intended in this statement?	Government confirmed the reference, no change.
178	Labor Allocation	Volume 1 Technical Acceptability – (c) Staffing Plan, paragraph (c)(4)(i)-(ii) - Page 61 of 82	Paragraph (c)(4)(i)-(ii)	Page 61 of 82	The DRFP requires both support-labor and PMO-hour allocations between Core and MSR CLINs to be within ±2.0% of the craft-labor allocation. Please clarify whether this allocation is intended strictly as a pricing allocation methodology or whether NASA expects the actual level of support and PMO effort performed for Core and	L-05 "Fixed Price Template" will be updated to address this issue in the Final RFP.

					MSR work to maintain the same proportional relationship throughout performance? Please also clarify how PWS Section 5 support labor, which is expressly excluded from paragraph (c)(4)(i), should be treated in the L-05 Labor Allocations worksheet.	
179	PWS	4.6.1	11	130	Paragraph (a) has a bookmark error. "Section 1.2.1Error! Reference source not found" Can the Government provide this reference?	The Government reviewed this section and could not find the error.
180	PWS	4.6.1	12	130	Item 12 states "Provide, operate, and maintain a customer accessible webpage on the Government provided SharePoint site with all pertinent contract information and link to the Government contract management portal." Please provide specifications for what is contained in the webpage that is not within the Government contract	The government contract management portal already exists and will be provided to the awardee. PWS Section 4.6.1 will be revised to clarify.

					management portal?	
181	DRFP Sections A-M	1852.215-81 Proposal Page Limitations	b.7	72	Proposal Page Limitations section limits the fonts to "not smaller 10-point type Text". Section L, VOLUME 1 TECHNICAL ACCEPTABILITY INSTRUCTIONS, Paragraph (d.1) Business operations and scheduling requires a visual or graphical interfaces, which may require smaller fonts to display. Will the Government consider removing font size requirements for computer screenshots diplaying applications? This will allow evaluators can read and evaluate the entire context of the application instead of portions that meet the font size requirement.	No change.

182	PWS	Attachment J-01, PWS 2.1.1.2 and 4.6.1 Tech Exhibit 4.6-1	2.1.1.2	46	Tech Exhibit 4.6-1 identifies IBM Maximo 7.6, indicates the application was upgraded in FY17, and states that KIAC is required to upgrade the application every two years. Will the Government please provide the current Maximo 7.6 release, patch/fix-pack level, most recent upgrade date, current system architecture, installed modules/add-ons, interfaces, and planned upgrades through SIMO contract start?	The Offeror will be responsible for the configuration, utilization, and maintenance of Maximo (Version 7.6) (see also PWS Section 2.1.1.2 and Tech Exhibit 4.6-1, SIMO Managed Applications). There are no planned upgrades through SIMO Contract start.
183	DRFP Sections A-M	1852.215-81 Proposal Page Limitations	A	72	Would the government confirm page limits and file formats for Sections required in Volume IV Plans and Other Data?	Provision 1852.215-81 Proposal Page Limitations will be updated in the Final RFP.

184	DRFP Sections A-M	1852.215-81 Proposal Page Limitations	A	72	Would the government confirm that there is no page limit for Volume 5 Model Contract?	Provision 1852.215-81 Proposal Page Limitations will be updated in the Final RFP.
185	Attachment L-01 Minimum Staffing Requirements	Labor Categories identified with asterisk (*)			Attachment L-01, Minimum Staffing Requirements, identifies certain labor categories with an asterisk (*); however, the Attachment does not appear to define the asterisk. Can NASA please clarify the meaning and any associated requirements applicable to labor categories identified with an asterisk (*)?	Attachment L-01, "Minimum Staffing Requirements," row 75 provides the asterisk (*) definition.
186	DRFP Section L	1852.215-81 Proposal Page Limitations	(b)(8)	page 73 of 82	The following references a Mission Suitability volume: "(8)The total page limitatio n for Mission Suitability (t o include all subfactors) is combined and the Offeror shall determine the appropriate page distribution among the subfactors." Would the government consider removing the confusing	Provision 1852.215-81 Proposal Page Limitations will be updated in the Final RFP.

					reference to a Mission Suitability volume?	
187	DRFP Section L	Vol 3 Price Instructions – L(a)(6)	Escalation	page 65	Instruction states that The Offeror shall include an affirmative statement the Offeror's proposed prices do not apply escalation to wages and fringe benefits for service employees. If the CBA has rates beyond the base year of the contract and into the option years, shall offerors use those prescribed rates in the development of the price, or should no escalation be applied? If the answer is to use the prescribed rates, how should offerors modify the required affirmation?	The L-05 "Fixed Price Template" will be updated to align with Section L instructions in the Final RFP.

188	DRFP Section L	Vol 3 Price Instructions – L(b)(7)	Attachment L-01 Minimum Staffing Requirements	page 65	In reference to the bolded requirement pasted below, Can the government confirm that offerors are not required to complete the Attachment L-01 Minimum Staffing Requirements? (7) The Offeror's Attachment L-05, Fixed Price Template, submittal shall represent a fully integrated cost /pricing strategy to include all subcontractors. The Offeror shall complete Attachment L-01, Minimum Staffing Requirements, consistent with its management and technical approach to execute requirements.	Attachment L-03 "Price Instruction" (b) (7) will be revised for clarification in the final RFP. Attachment L-01 "Minimum Staffing Requirements" does not require Offeror input.
189	Plans and Other Data	Section L	1852.215-81	72	In this section, it requests Data Required for A.I. Solutions. Please clarify what data is required for this section.	Provision 1852.215-81 Proposal Page Limitations will be updated in the Final RFP.

190	Plans and Other Data	Section L	1852.215-81	72	Please advise what page L.6.2 Para (b)(2) can be found on and/or what data is required here.	Provision 1852.215-81 Proposal Page Limitations will be updated in the Final RFP.
191	Other Proposal Instructions and Eligibility Requirements	Section L		72	This section lists three additional items: Small Business Participation; Safety, Health, Quality Assurance and Environmental; and Adequate Accounting System. Please clarify which volume(s) these should be included in. Please note the Price Volume 3 is also to address accounting system adequacy.	Provision 1852.215-81 Proposal Page Limitations will be updated in the Final RFP.
192	DRFP Sections A-M.pdf, Attachment J-08 Key Personnel and Key Position Minimum Qualifications Cover Page.pdf	Section H - Special Contract Requirements	NFS 1852.235-71 Essential Personnel and Facilities (Sep 2025) (DEVIATION); Attachment J-08	33	Attachment J-08 contains only a cover page. Will there be key personnel requirements in the final solicitation?	No. Sections A-M will be updated in the Final RFP.

193	Attachment L-05 Fixed Price Template DRFP.xlsx, Attachment J-03 Contract Schedule Tables.xlsx, Attachment J-01 PWS.pdf	L-05 Core Work worksheet; J-03 Table B.1.1-1.1 NASA CLIN 001 Pricing; PWS 4.0 Technical Support Services	L-05 Core Work SLINs 001-101 through 001-122; PWS 4.1, 4.4, 4.5, 4.6	PWS pp. 111, 123, 125, 127	PWS Sections 4.1, 4.4, 4.5, and 4.6 do not appear to have a dedicated Core Work SLIN in Attachment L-05 or Attachment J-03. Could the Government please identify the SLIN where offerors should price these requirements?	Attachment L-05 "Fixed Price Template" will be updated for the Final RFP to add a SLIN.
194	Attachment L-01 Minimum Staffing Requirements.xlsx, DRFP Sections A-M.pdf, Attachment L-05 Fixed Price Template DRFP.xlsx	VOLUME 1 TECHNICAL ACCEPTABILITY INSTRUCTIONS	(c)(4)(i) and (ii); L-01 Summary note **; L-05 Labor Allocations worksheet	61	Attachment L-01 identifies several labor categories under Core Work only (e.g., Facility Manager, IT Professional, Quality Inspector). Our understanding is that note ** permits offerors to also show these categories under the MSRs CLIN where needed to meet the +/-2.0 percent allocation requirement. Could the Government please confirm?	Confirmed.
195	Attachment L-01 Minimum Staffing Requirements.xlsx, DRFP Sections A-M.pdf	VOLUME 1 TECHNICAL ACCEPTABILITY INSTRUCTIONS	(c)(2); L-01 Summary, Total Hours (row 3)	60	Attachment L-01 identifies 809,600 minimum hours for each full contract year (404,800 hours for Contract Years 1 and 9). Could the Government please confirm that these minimum hours include Core Work and MSRs hours for the prime and all subcontractors, and exclude IDIQ Work CLIN	Confirmed.

					and phase-in hours?	
196	Attachment L-05 Fixed Price Template DRFP.xlsx, DRFP Sections A-M.pdf	L-05 Pricing Instructions worksheet, General Instructions; VOLUME 1 TECHNICAL ACCEPTABILITY INSTRUCTIONS	L-05 General Instructions 5 and 6; Section L Vol 1 (c)(4)	61	For trade personnel performing work under PWS 5.0 (e.g., fleet vehicle mechanics), could the Government please confirm these should be designated Support Labor rather than Craft Labor?	Fleet vehicle mechanics do not perform work under 5.0 "Enterprise Logistics." Fleet vehicle mechanics perform work under Attachment J-01, "PWS," 3.2.14 "Heavy Equipment." Trade personnel performing work under 5.0 should be designated as Support Labor.
197	DRFP Sections A-M.pdf; DRFP_80KSC027R0001_DRDs.pdf	Contract Phase-In; applicable DRDs	Contract Phase-In (e); DRD 1.2-12; DRD 1.2-14; DRD 1.7-01; DRD 5.1-01	Sections A-M pp. 56-57; applicable DRDs	Section L states that the listed DRDs shall be submitted during phase-in.No However, several listed DRDs establish initial due dates beyond the maximum 45-day phase-in period. For example, DRD 1.2-12, DRD 1.7-01, and DRD 5.1-01 are due within 60 days after award, while DRD 1.2-14 is due within 60 days after contract start. Could the Government please clarify the controlling initial	Contract Phase-in Paragraph (e) will be updated to remove DRDs with due dates beyond the phase-in period.

					submission dates for each DRD identified in the Contract Phase-In requirement?	
198	DRFP Sections A-M.pdf	Contract Phase-In; Place of Performance	Contract Phase-In (c); Place of Performance	pp. 56 and 16	Contract phase-in activities are stated to be performed at KSC, while contract performance includes NASA facilities at CCSFS. Will the successor contractor be permitted and expected to conduct phase-in activities at CCSFS when required to validate facilities, systems, property, access, or other startup conditions?	Yes.
199	DRFP Sections A-M.pdf; DRFP_80KSC027R0001_J_Attachments.pdf	Volume 1 Technical Acceptability Instructions; Staffing Plan	Contract Phase-In; Staffing Plan requirements	pp. 60-61	The Offeror must identify whether it intends to bridge existing or negotiate new collective bargaining agreements during phase-in. Will the Government provide the current applicable collective bargaining agreements and sufficient non-PII incumbent workforce information to support this decision and transition	Current CBAs and available non-PII incumbent workforce information will be posted as controlled documents in SAM/Bidders Library prior to the Final RFP to support Offeror planning.

					planning, including headcount by bargaining unit/labor category, work location or shift, vacancies, and required certifications or licenses?	
200	DRFP Sections A-M.pdf; DRFP_80KSC027R0001_J_Attachments.pdf	Volume 1 Technical Acceptability Instructions; Computerized Maintenance Management System	Technical Acceptability; PWS 2.1.1.2	Sections A-M p. 60; J-01 p. 46	The phase-in plan must address configuration of Maximo and EWRS. Could the Government please identify when during phase-in the successor contractor will receive the system access and administrative/configuration privileges necessary to perform these activities? Additionally, what existing Maximo/EWRS data will be made available to the successor contractor, and when?	SIMO Maximo and EWRS will be made available to the successor contractor for configuration and administrative activities at phase-in start.

201	DRFP Sections A-M.pdf; DRFP_80KSC027R0001_J_Attachments.pdf	Volume 1 Technical Acceptability Instructions; Computerized Maintenance Management System	Technical Acceptability; PWS 2.1.1.2, No. 1.a	Sections A-M p. 60; J-01 p. 46	Section L requires Maximo configuration during phase-in, while PWS 2.1.1.2, No. 1.a allows 30 days from the contract effective date to update Maximo asset data. Could the Government please clarify the minimum required Maximo operational condition at contract start and identify which configuration and data-validation activities may be completed during the first 30 days of performance?	The Government does not consider the requirements in Section L and PWS Section 2.1.1.2-1(a) to be conflicting. Offerors shall develop and execute a phase-in approach that provides for the transition and configuration of Maximo necessary to support contract performance on the contract effective date. The 30-day period identified in PWS Section 2.1.1.2-1(a) applies to the Contractor's responsibility to update and validate Maximo data as specified in the PWS and should not be construed as delaying the Contractor's ability to utilize Maximo for contract performance.
202	DRFP Sections A-M.pdf; DRFP_80KSC027R0001_J_Attachments.pdf	Volume 1 Technical Acceptability Instructions; Government-Furnished Property	Government Property / Phase-In requirements	Sections A-M p. 60	The Offeror must schedule completion of a 100 percent inventory of ECN-tagged equipment before the contract effective date. Could the Government please clarify when the successor contractor will receive physical access to the equipment and associated property records, whether NASA and/or the incumbent will participate in the inventory, and how equipment that is inaccessible, deployed, or	The successor contractor will have physical access to ECN-tagged equipment at the start of phase-in activities. An updated copy of Attachment J-10 "Government Furnished Property" will be provided on start of of phase-in. 100% physical inventory of ECN-tagged equipment will be conducted by the incumbent and successor contractors, in coordination with the KSC Supply and Equipment Management Officer (SEMO). The Government will not physically participate in the

					otherwise unavailable during phase-in will be treated for completion purposes?	joint inventory, but will oversee progress of 100% inventory. The KSC SEMO will coordinate with the incumbent and successor contractors to identify and approve alternative inventory methods for ECN-tagged equipment that is offsite or inaccesible during phase in, including but not limited to, perpetual inventory, electronic location verification etc.
203	DRFP Memo to Potential Offerors.pdf; DRFP Sections A-M.pdf; DRFP_80KSC027R0001_J_Attachments.pdf	Security Classification Requirements	NFS 1852.240-75	Memo p. 3; Sections A-M p. 49	The DRFP requires a Secret facility clearance and states that application for security clearance shall be submitted during contract phase-in. Could the Government please clarify whether an Offeror must possess the required Facility Clearance Level at proposal submission or award, or whether initiation and processing of the facility clearance during phase-in satisfies the requirement provided the clearance is obtained before classified performance is required?	Performance under this contract will involve access to and/or generation of classified information, work in a security area, or both, up to the level of Secret. See Federal Acquisition Regulation clause 52.240-92 in this contract and DD Form 254, Contract Security Classification Specification, Attachment 15. Application for security clearance shall be submitted during contract phase-in.

204	DRFP Sections A-M.pdf; DRFP_80KSC027R0001_J_Attachments.pdf	Staffing Plan; Computerized Maintenance Management System	Staffing Plan; PWS 2.1.1.2	Sections A-M pp. 60-61; J-01 p. 46	To support development of the Offeror's independent staffing estimate, will the Government provide historical Maximo workload data for a representative period, preferably the most recent 24–36 months, including work-order volumes, work types, priorities, labor hours, facility or asset, preventive maintenance workload, reactive maintenance workload, and current deferred-maintenance/backlog information?	See Historical Data file released to SIMO Bidders Library August 18, 2026.
205	DRFP_80KSC027R0001_J_Attachments.pdf	PWS; Business Management	PWS 1.2.1, Item 22	J-01 p. 13	Could the Government please describe the transition data package it intends to make available to the successor contractor during phase-in, including current CMMS data, work in process, open procurements, frustrated receipts, deferred maintenance, active maintenance schedules, and other operational records needed to assume performance? What is the expected timing and format of this transfer?	The Government anticipates providing operational data necessary to support transition; however, the specific content, timing, format, and method of data transfer will be determined during post-award transition planning and coordinated in accordance with contract requirements. Offerors should develop their phase-in approaches to account for the transfer, validation, and assumption of operational data required for contract performance, including information maintained in Government systems such as Maximo and EWRS.

206	DRFP_80KSC027R0001_J_Attachments.pdf	PWS; Business Management	PWS 1.2.1, Item 22	J-01 p. 13	Could the Government please clarify how work in process, open purchase orders, pending material receipts, open MSRs, and other actions initiated by the predecessor but incomplete at contract start will be dispositioned? Specifically, which actions will transfer to the successor as part of Core Work and which will require separate Government authorization or funding?	The Government will determine the disposition of work in progress and other incomplete actions at transition based on the status of the work, contractual authority, funding, and mission requirements at that time. Offerors shall develop their phase-in approach in accordance with the solicitation and be prepared to assume responsibility for work authorized under the successor contract as directed by the Government; the transfer, continuation, closeout, or reauthorization of specific actions will be addressed by the Government during transition.
207	Attachment L-01, Minimum Staffing Requirements; Section M, Technical Acceptability (c)(iii)				The staffing plan is evaluated for meeting the Government's minimum labor-hour requirement (809,600 hours per full contract year). Section L requires the staffing plan to include both 'Prime Labor Detail' and 'SubK Labor Detail' worksheets (Attachment L-05), but does not state expressly that subcontractor hours count toward the minimum. If they do not, offerors are discouraged from assigning substantive work to small businesses.	Confirmed.

					Confirm in the Final RFP that subcontractor hours, including small business subcontractor hours, count toward the L-01 minimums, and that a labor category may be filled entirely by a subcontractor.	
208	Sections A–M	Section B, IDIQ Minimums and Maximums Values	(a)	6	Section B, IDIQ Minimums and Maximums Values (a) (p. 6) sets a minimum of "$100 million for option periods 1 through 3." This can be read as either per option or for Options 1–3 combined. Questions: • Is the $100 million minimum for each option period, or for Options 1–3 combined?	Sections A-M will be updated for the Final RFP.
209	Sections A–M L attachments	Section B, MSRs Section L, Volume 3 Attachment L-05, Fixed Price Template	(c) (c)(6)(i) and (ii) MSRs tab	6 66 N/A (spreadsheet)	Section B, MSRs (c) (p. 6) requires MSR unit prices to include all costs, including indirect costs and internal work processes, so offerors must price fixed support costs into each MSR unit. At the industry day, NASA said MSR prices include "craft labor, PMO allocation, support labor and other elements." But the BEQs "do not represent a limit or	The only guaranteed minimum ordering quantity or value is the SIMO contract IDIQ minimum. No change in MSR approach.

					guarantee of future work" (Section L, Volume 3 (c)(6)(i), p. 66), and "no future adjustment, increase or decrease, will be made as a result of ordering above or below the BEQs" (Section L, Volume 3 (c)(6)(ii), p. 66). The L-05 MSRs tab BEQs also run about 8% above FY2020–2025 actuals, about 21,000 more MSRs over the contract. If fewer MSRs are ordered than the BEQs, those support costs aren't recovered. During the SOCS procurement, the Government stated in a June 26, 2025 meeting that the MSR quantities in Attachment J-04 were guaranteed. Questions: • At the one-on-one, NASA said the BEQs are for pricing purposes only and that offerors should focus on the IDIQ minimum. Please confirm that the Section B IDIQ minimum is the only guaranteed ordering amount. • Will NASA consider either a price adjustment when ordered MSRs fall	

					below a set percentage of the BEQs, or allowing offerors to price fixed MSR support costs in the core CLINs?	
210	Bidders Library L attachments	Workload indicator workbook Historical data workbook Attachment L-01, Minimum Staffing Requirements	WLIs 37–39 and 41 FY2019–FY2026 —	N/A (spreadsheet)	NASA's workload assumptions for job urgency don't match the history it posted, and the urgency mix drives how many crafts we staff to meet response times. WLIs 37–39 in the workload indicator workbook set Urgent at "10%," Priority at "10%" and Standard at "80% of Historical REPs TCs SRs," noted as a "New prioritization classification for SIMO," and WLI 41 sets urgent trouble calls at "10% of Historical RTCs." The historical data workbook (FY2019–FY2026) shows trouble calls at 24% Urgent and 10% Emergency. Attachment L-01 sets 809,600 minimum annual hours. Questions: 1. How do the historical	The intent of the historical percentages is to provide Offerors past actual data. The intent of the WLIs is to provide the Government's best estimates of future utilization on SIMO.

					codes (Emergency, Urgent, Routine, Discretionary, Priority) map to the SIMO classes? 2. For staffing purposes, do the WLI percentages govern? 3. Can NASA estimate how the 809,600 minimum annual hours split between MSR and core work?	
211	Bidders Library	PM Job Plan Tasks Through 09 2026	—	N/A (spreadsheet)	The Bidders Library file "PM Job Plan Tasks Through 09 2026" lists tasks for 2,319 job plans but no labor hours, crafts or frequencies, so offerors can't build PM staffing from Government data. Questions: • Will NASA post labor hours, crafts and frequencies for the PM job plans?	Offerors are directed to the historical data provided in the Bidder's Library, which contains information relevant to estimating workload, resource requirements, and staffing needs.
212	J attachments L attachments	Attachment J-01, PWS Attachment J-01, PWS Attachment J-01, PWS Attachment J-01, PWS Attachment L-02, Government SLCs and Qualifications	PWS 1.8.4.2 PWS 1.6.1.3.2 PWS 7.1.1.11 PWS 2.2.1.2.4 SIMO tab	32 24 155 59 N/A (spreadsheet)	NASA said design engineering is out of scope and that offerors map positions only to L-02, whose SIMO tab has 125 labor categories, with Engineering Technician I–IV but no engineer. The PWS still assigns work that requires engineers: PWS 1.8.4.2 (p. 32) requires environmental permit packages "signed/sealed by	The labor classifications identified in Attachment L-02, "Government SLCs and Qualifications", are sufficient to satisfy most of the core work requirements referenced in the question. Professional Engineering (PE) service requirements may be provided and priced as Other Cost Elements (OCE) in attachment L-05, "Pricing Template."

					a Professional Engineer licensed in the State of Florida"; PWS 1.6.1.3.2 (p. 24) refers to "Contractor-managed work designs involving new and modified FSEU…"; and PWS 7.1.1.11 (p. 155) requires the contractor to "Provide engineering and engineering support services, as required…" Separately, PWS 2.2.1.2.4 (p. 59) covers MSR escalation, and PWS 2.2.1.2.4.c prohibits recategorization after repair work is complete. Questions: • Will NASA review these PWS paragraphs and consider rewording text that indicates engineering support is required by the SIMO contractor, or add engineer categories to L-02? • When NASA's engineering disposition changes a repair, for example an obsolete motor whose only available replacement needs new mounting and electrical changes, will NASA treat the added work as a Government-approved	Please see Attachment J-01 "PWS" Section 2.2.1.2 which describes the escalation process.

					escalation under PWS 2.2.1.2.4, approved before work resumes, or move it to a task order?	
213	Bidders Library DRDs J attachments	ACAs and OAs DRD 1.2-02 Attachment J-01, PWS	— Paragraph n PWS 4.1.1.11	N/A 2 114	The Bidders Library has about 30 associate contractor agreements (ACAs) and operating agreements (OAs) the incumbent signed with other Kennedy contractors. Several appear outdated, such as eight OAs with TOSC (OA BOSS TOSC 01–08), the predecessor to COMET, a 2010 OA under the pre-BOSS ISC contract and many that still name PAE-SGT. Some assign work beyond the SIMO PWS, such as off-shift Mobile Launcher GN2 and GHe console coverage (ACA-KPLSS II-BOSS-OA-01), trailer rounds (OA-BOSS-TOSC-01) and Pad B structural and civil maintenance (OA-BOSS-TOSC-03). The draft RFP has no associate contractor clause, and DRD 1.2-02,	Attachment J-01 "PWS," 1.2.1, No. 28 will be added to clarify ACA requirements in the Final RFP.

					paragraph n (p. 2), mentions ACAs only as part of the management approach, so it doesn't say which agreements carry over or how they're handled at transition. PWS 4.1.1.11 (p. 114) also requires releasing contractor-developed or adopted documents into TechDoc. Questions: • Will NASA provide a list of the agreements that remain active? • Must the SIMO contractor update and execute the active ACAs and OAs by the end of phase-in?	
214	Bidders Library J attachments	Workload indicators and historical data sets Attachment J-01, PWS Attachment J-01, PWS Attachment J-01, PWS	— PWS 4.1.1.5.a PWS 3.2.14.1.5 PWS 3.2.14.4.2	N/A 113 107 108	Thank you for agreeing at the one-on-one to look into the "SIMO Historicals" data. 58 of the 113 workload indicators point to "SIMO Historicals," but the posted workbook covers only work orders. Volumes not posted include 22 enterprise logistics indicators (WLI 80 puts logistics at "60–70 WYE"); switching orders, alarms and maintenance action requests (MARs); landfill and aggregate	Deferred Maintenance List, Historical TALs and Job Plans List will be updated in the Bidders Library prior to Final RFP release. Late EO releases (if any) will be considered on a case-by-case basis.

					reclamation yard (DARCY) tonnage; and utility locates. Several other data sets are out of date: the deferred maintenance list (last item added April 23, 2024; 122 of 1,129 items marked "TBD"); asset condition codes (3,093 of 18,319 assets assessed in 2010–2013, none after 2024); EGS launch WADs (none of the 38 WAD job plans appear in the PM job plan file); historical task orders (end in FY2024); and technical anomaly (TAL) history (ends in May 2024). Two data sets the PWS requires aren't posted: the engineering order (EO) backlog, though PWS 4.1.1.5.a (p. 113) requires incorporating "all existing EOs on configured drawings/documents into new drawing/document revisions within two years of original EO release date"; and a sling and test weight list, though PWS 3.2.14.1.5 (p. 107) and 3.2.14.4.2 (p. 108) require providing, maintaining and load testing slings and	

					lifting assemblies (SOCS listed these in Tech Exhibit 3.2.14.3-1; SIMO has no matching exhibit). Questions: • Which of these data sets will be posted before the final RFP? • Will NASA post an updated deferred maintenance list? • For EOs already more than two years past their release date at contract start, will NASA set a new deadline?	
215	Sections A–M Technical Exhibits Bidders Library J attachments	Section B, Non-Proposed ODCs Tech Exhibit 4.6-1 Control systems inventory Attachment J-01, PWS	(c)(2)(i) — — PWS 4.1.1.10	7 N/A N/A 114	Section B, Non-Proposed ODCs (c)(2)(i) (p. 7) says NASA pays for "software licenses identified in… Tech Exhibit 4.6-1." But some licenses must come from the incumbent, and the software list conflicts with itself. Tech Exhibit 4.6-1 lists 815 IBM Maximo 7.6 licenses on one tab and 800 on another, and also refers to "Agency CMMS Maximo Standards." It lists EZMaxMobile as V6.1.1 on one tab and V5.1.1 on another, and states that the "Contractor will need to obtain licenses from Incumbent." Its scheduling	A. 1: Tech Exhibit 4.6-1 "SIMO Managed Applications" will be updated in the Final RFP to clarify conflicting information. A. 2: Tech Exhibit 4.6-1 "SIMO Managed Applications" will be updated in the Final RFP to clarify conflicting information. A. 3: Yes. A. 4: Yes. The Enterprise CMMS is IBM Maximo Application Suite (MAS) and will include scheduling and mobile functions. A. 5: No.

					tools are Akwire Scheduler, EZMaxPlanner, Akwire Visual Suite and Primavera Project Planner. At the industry day, NASA stated the HQ Enterprise CMMS rollout is planned for September 2027. The Bidders Library includes a control systems inventory (2,086 controllers, September 2024) and BOSS continuous-monitoring requirements for control systems, and PWS 4.1.1.10 (p. 114) requires updating the MaxCMDS/OMEU database within 30 days of contract start. We need to know what system access and control system responsibilities SIMO has at contract start. Questions: 1. Please confirm that licenses obtained from the incumbent are covered as non-proposed ODCs. 2. Is the Maximo license count 815 or 800, and does NASA provide licenses for users beyond that count? +H159+H159 3. Do the Akwire and EZMaxMobile licenses continue until the rollout?	A. 6: Yes. A. 7: Tech Exhibit 4.6-1 "SIMO Managed Applications" will be updated in the Final RFP to clarify responsible parties. A. 8: Access will be provided during Phase-In. All Maximo licenses needed to perform SIMO will be provided by the Government.

					4. Is the Enterprise CMMS IBM Maximo Application Suite (MAS), and will it include scheduling and mobile functions? 5. Will Government-furnished software include Microsoft Power BI licenses? 6. Will the contractor have read-only access to control system trend data? 7. Does SIMO take on security plans and continuous monitoring for the 2,086 control systems, and is that inventory current? 8. Will SIMO have edit access to MaxCMDS, TechDoc and the EDC at contract start, or will NASA grant access during phase-in? Are any MaxCMDS licenses needed beyond the Maximo licenses in Tech Exhibit 4.6-1?	

216	Sections A–M L attachments	Section L, Contract Phase-In Section L, Volume 1 Section L, Volume 1 Section L, Volume 3 Attachment L-03, Corporate-Owned Contract Property	(b) (a)(5) (a)(4) (c)(9) —	56 60 60 67 N/A (spreadsheet)	Phase-in "shall not exceed 45 days" (Section L, Contract Phase-In (b), p. 56) and must include "a schedule for completing 100 percent inventory of ECN-tagged equipment prior to the contract effective date" (Section L, Volume 1 (a)(5), p. 60). Offerors must also plan and price buying Attachment L-03 property, about 3,500 items, from the predecessor contractor (Section L, Volume 1 (a)(4), p. 60, and Volume 3 (c)(9), p. 67), which an offeror that buys L-03 property would need to verify during phase-in, along with the ECN-tagged inventory. The draft RFP doesn't say who takes part in these inventories or how L-03 property is transferred. Questions: • Is the ECN-tagged equipment inventory a joint inventory with the Government? • Will the Government take part in a joint inventory of L-03 property, and will the incumbent be required to support it?	100% physical inventory of ECN-tagged equipment will be conducted by the incumbent and successor contractors, in coordination with the KSC Supply and Equipment Management Officer. The Government will not physically participate in the joint inventory, but will oversee progress of 100% inventory. No, the Government will not be involved in the joint inventory of any property procured by the successor from the incumbent as listed in Attachment L-03 "Corporate-owned Contract Property." No other physical property inventories resulting in deliverables will be required during phase-in activities. Yes, an updated copy of Attachment J-10 "Government Furnished Property" will be provided on start of phase-in. No, it is not a requirement to procure incumbent corporate property listed in Attachment L-03, Corporate-owned Contractor Property.

					• Are any other inventories required during phase-in that result in a deliverable to NASA? • Will NASA provide the incumbent's property records and asset condition assessments at the start of phase-in? • Is the SIMO contractor required to buy the L-03 property, or may it provide its own equivalent items?	
217	CBA-2026-573 L attachments	Amentum Spaceport and IAM agreement Attachment L-01, Minimum Staffing Requirements Attachment L-02, Government SLCs and Qualifications	— — —	N/A N/A (spreadsheet) N/A (spreadsheet)	CBA-2026-573 between Amentum Spaceport and IAM adds the job classification "HVAC Control Technician," which isn't in Attachment L-01 or L-02. Questions: • Will NASA add the HVAC Control Technician position to Attachments L-01 and L-02?	The labor classifications identified in Attachment L-02, "Government SLCs and Qualifications", are sufficient to satisfy the core work requirements.
218	KSC-PLN-1300	Section 3.3	—	N/A	At the industry day, NASA said center outage management is a NASA function under SIMO. But KSC-PLN-1300, Section 3.3, says the Outage Coordinator comes "from the ranks of the contracted KSC institutional operations, maintenance, and support services provider."	The Government confirms that NASA is responsible for Center-level outage management and serves as the Center Outage Coordinator under SIMO. The SIMO Contractor's responsibility is to plan, request, schedule, coordinate, and support outages required to execute Contractor-performed work on assigned FSEU in accordance with the PWS to

					Questions: • Please confirm that the Outage Coordinator is a NASA position under SIMO, and that SIMO's outage role is to schedule, request and coordinate outages for its own work.	include coordination with Center-level outage coordinators and any affected customers. KSC-PLN-1300 is provided as a historical reference only.
219	Sections A–M	Section L, Other Proposal Instructions/Eligibility Requirements Section H, AbilityOne Subcontracting	(a)(2) (a) and (c)	68 28	Section L, Other Proposal Instructions/Eligibility Requirements (a)(2) (p. 68) doesn't say which work counts toward the small business subcontracting base. The AbilityOne clause also uses two different bases: Section H, AbilityOne Subcontracting (a) (p. 28) sets the goal as a percent of "total contract value," with the value left blank, while (c) (p. 28) measures "the total dollar obligated" (at least 1%). Questions: • When offerors calculate total planned subcontracting dollars for the small business goals, should they include only core work, or also IDIQ work (MSRs and task orders) and the $61.66 million in non-proposed ODCs?	Subcontracting plan goals are proposed by the Offeror in accordance with the DRFP instructions for Volume IV and FAR 52.219 9, Alt II. Government non proposed ODCs are identified separately and are not proposed by the Offeror; therefore, Offerors will include Government non proposed ODC plug values directly in planned subcontracting dollars. Offerors may recover associated costs or fees via other cost elements as instructed in the Price Volume.

					• If IDIQ work is included, should offerors use the IDIQ minimum, the maximum or the BEQs? • For AbilityOne, which base applies, and does it include non-proposed ODCs?	
220	J attachments L attachments	Attachment J-01, PWS Attachment L-02, Government SLCs and Qualifications	PWS 1.10.1.4 SIMO tab	42 N/A (spreadsheet)	PWS 1.10.1.4 (p. 42) requires the contractor to "Provide a dedicated on-site Directorate Facility Utilization Manager (DFUM)," but L-02 has no matching category, and it's unclear whether the position counts toward the minimum hours. Questions: • Which L-02 category applies? • Is the DFUM a full-time position? • Do the position's hours count within the 809,600 minimum annual hours?	Please see Attachment L-02, "Government SLCs and Qualifications." PWS 1.10 "Facility Management" will be updated in the Final RFP. Appendix J01-1, the Glossary will be updated to define "dedicated." Yes. These hours are included in the Government's total minimum labor hours.

221	Sections A-M	Section M Past Performance Evaluation	(c)(6)	186	This section states the Government will consider parent/affiliate resources if they "participate meaningfully." Could the Government provide specific parameters or examples of what constitutes "meaningful participation" (e.g., specific Key Personnel roles, financial guarantees, or a minimum percentage of total labor hours)?	With respect to the past performance of a parent or affiliate company, corporation, division, business unit, or segment (i.e., parent/affiliate), the solicitation provides that the Government may consider such performance, but only to the extent that the parent/affiliate participates meaningfully in the resultant contract. The solicitation also cautions Offerors that "it is not sufficient to include general statements about the availability of affiliate resources to move between parent/affiliate companies." Reference Section L provision, "Past Performance," paragraph (c). It is the responsibility of the Offeror to identify the "resources" that the parent/affiliate would be responsible for providing, to describe how the resources would meaningfully affect performance, and to include signed letter(s) of commitment from the parent/affiliate corporation. The solicitation provides various examples of what constitutes a "resource." For example, in the case of management personnel, such person(s) must be or have been responsible for the day-to-day

						operations of the affiliate contract; and such person(s) would be required to support similarly situated position(s) under the SIMO contract, so as to meaningfully affect performance (i.e., the proposal must establish how management personnel from the affiliated company will provide management/decision making authority or other technical support to the SIMO contract).
222	Section M, Small Business Participation, para (a) (p. 81)				Small business participation is evaluated only for compliance with proposal instructions and FAR 52.219-9, Alternate II. It is not one of the four Technical Acceptability areas and is not a discriminator in the Past Performance/Price tradeoff. An offeror proposing minimal or non-substantive small business work is therefore rated the same as one committing significant work to small businesses. State which evaluation factor this falls under and how it is rated. Make small business participation a discriminator in the tradeoff (as a separate factor or a Past	The Government will evaluate offers in accordance with Section M of the SIMO RFP.

					Performance sub-factor), or at minimum set minimum small business participation goals, by percentage of total contract value and by SDB, WOSB, SDVOSB and HUBZone category, as an acceptability criterion. Evaluate the extent to which small businesses will perform the labor categories in Attachment L-01.	
223	Industry Day Questions				What is the current excess/disposal backlog SIMO would inherit including heavy equipment and vehicles out of services or awaiting repair or disposal?	There is currently no appreciable backlog of heavy equipment or vehicles.
224	Industry Day Questions				Will SIMO have any wind-down Mobile Launcher 2 (ML2) role? Does NASA expect any changes to ML-1, VAB, or Pad 39B facility system support that SIMO should price?	There will be no SIMO activities for ML2. Reference PWS Section 6.0 "EGS Operational Support" for requirements related the ML1, VAB, and Pad 39B.

225	Industry Day Questions				Will event frequency for FPL Commercial/Industrial Load Control (CILC) events be provided?	No.
226	Industry Day Questions				Does any other KSC contract collect or haul refuse to the landfill?	All KSC organizations and NASA contractors are allowed to use the KSC Landfill for disposal of permitted waste during open hours.
227	Industry Day Questions				Is any Haulover Canal Bridge rehabilitation anticipated or scheduled during SIMO?	Offerors shall develop their proposals based on the requirements, assets, and information provided in the Final RFP. Historical information is also provided in the Bidders Library for Offeror reference.

228	Industry Day Questions				Is the software that runs the IACP and Utility Annex systems government furnished to SIMO?	No. The Government is responsible for the control logic application/program for the chiller plants and associated automation systems.
229	Industry Day Questions				Which areas need a secret clearance or special access program (SAP) access, and where will SIMO staff need escorts or cleared access?	Attachment J-01, the “PWS” section, will be updated to specify the required security clearance.
230	Industry Day Questions				After the move to enterprise CMMS, will AKWire Scheduler, EZMaxPlanner and EZMax Mobile stay in use or will NASA use the Scheduler and Maximo Mobile functions included in MAS?	eCMMS will use Scheduler and MaximoMobile.

231	Industry Day Questions				Which Kennedy Systems and equipment have been upgraded or replaced in the last 3 years, or are planned to be during SIMO including projects funded by the One Big Beautiful Bill Act?	Offerors shall develop their proposals based on the requirements, assets, and information provided in the Final RFP. Historical information is also provided in the Bidders Library for Offeror reference.
232	Industry Day Questions				For Facility Control Systems, like that shown for the Chiller Facility, are those systems regularly upgraded for cybersecurity? Is that the responsibility of SIMO?	Yes. Chiller Plant automation system computers regularly receive cybersecurity patches and Operating System (OS) (e.g., Windows, Linux, Mac) updates and patches. The SIMO Contractor is responsible for applying updates to the automation system computers.
233	Industry Day Questions				In reference to the Ability One requirement, will NASA mandate the functional area and or company to subcontract with? Other NASA contracts mandate functional areas.	No functional area will be mandated.

234	Industry Day Questions				It was briefed that Logistics Services would be required on SIMO. With the award of NASA NELSS BPA will all Logistics requirement to moved to NELSS Task Order?	No.
235	Industry Day Questions				Alarms/especially for other buildings, who fixes those issues?	If the asset is assigned SIMO FSEU, repairs to said systems shall be the SIMO contractor's responsibility.
236	Industry Day Questions				Who is tracking hours, miles, usage of equipment and how does it get put into Maximo?	Please reference Attachment J-01 PWS, 2.1.5 paragraph (1).

237	Industry Day Questions				Who generates EW, can contractor? What monitoring systems are in place to help identify?	Please reference Tech Exhibit 2.0-1 "Reference Documents Process Charts."
238	Industry Day Questions				Question about subcontractors and required minimum percentage of the contract. "If we bring in a major subcontractor, is there a requirement to give a certain percentage?"	Refer to Attachment A-M, OTHER PROPOSAL INSTRUCTIONS/ELIGIBILITY REQUIREMENTS, (a)(2).
239	Tech Exhibit 4.6-1 SIMO Managed Applications	Line 14, Licenses column			The exhibit identifies 321 licenses and states that BOSS pays for maintenance. Please confirm whether those licenses transfer to SIMO, whether they must be obtained from the incumbent, and which acquisition, renewal, and maintenance costs the SIMO contractor must price.	Tech Exhibit 4.6-1 will be updated to clarify that there is no ongoing maintenance cost. The licenses in Tech Exhibit 4.6.1 are needed to perform contract requirements and are Government-provided to the SIMO Contractor.

240	Bidders Library	Deferred Maintenance List			Of the more than 1,100 items listed in this document, virtually all were added to the plan (Column C) in early 2024 or earlier, and the recommended FY (Column A) contains dates no later than 2024. Q#1: Are all of these items still deferred? Q#2: Is the currrent list provided inclusive of all deferred maintenance as of the release date of the draft RFP?	Deferred Maintenance List has been updated and added to the Bidders Library.
241	Bidders Library	EGS Launch Operations WADS			Do the Job Plan designators in Column A correspond to what is in the Maximo database? If not, will NASA please provide a cross walk?	Yes. The Job Plan designators in Column A will correspond to the SIMO Maximo database.
242	Bidders Library	Asset Condition Codes			PWS states that the Contractor shall maintain assigned Facilities, Systems, Equipment, and Utilities (FSEU) and use asset condition information to support maintenance planning and execution. A significant number of the condition codes provided in the Bidders Library	Q#1: NASA will provide an update to the Asset Condition Code file in the Bidders Library prior to Final RFP release. Q#2 see response to question #1. Q3: All data will be updated in the Bidders Library prior to Final RFP release.

					appear to have assessment dates approximately 14 years old. Q#1: Please confirm whether NASA will provide updated condition assessments and condition codes for all assigned FSEU prior to the start of contract performance. Q#2: If not, please identify which condition data the Contractor should consider authoritative at contract start and whether the Contractor will be responsible for validating or updating existing condition codes after contract start. Q#3: Is the equipment referenced by the outdated "Asset Condition Codes," in columns H–J represented in NASA's deferred maintenance data?	
243	Attachment L-02				Can Offerors propose additional labor categories not included in Attachment L-02 or propose labor categories that exceed the qualifications of the categories provided? For example, an Engineer rather than Engineering Technician.	Offerors may propose additional labor categories not listed in Attachment L-02, Government SLCs and Qualifications, to execute their proposed approach as described in Attachment L-01 Minimum Staffing Requirements (See Note) and Attachment L-05, Fixed Price Template. In accordance with Section L, Volume 1 Technical

						Acceptability Instructions(c)(4), Offerors may also propose and map Contractor Labor Categories that meet or exceed the minimum education and experience cited in the Government Labor Categories in Attachment L-02, Government SLCs and Qualifications.
