Attachment #1 Amendment 0003

1305M327Q0023 Detroit Snow Removal Services Q&A

1. The SOW describes snow plowing and sidewalk clearing but does not explicitly address off-site snow hauling. Could you please clarify:

   - May snow be piled in designated areas on-site? If so, where?
     - **Yes. Traditionally, the two corners on the edge of the parking lot (pile/plow to grass areas first) away from the WFO building, on the east side of the Upper Air inflation building (grass or the edge of that asphalt), and at the edge of the two parking spots at the radar.**

   - Is off-site snow hauling and disposal required under any circumstances, including when on-site storage areas become full?
     - **Never been an issue and have never had snow hauled away, and we have had some harsh winters in the past 10-12 years. During the most active winters, we may lose a parking spot or two due to the snow piles, but that also has never been an issue.**

   - If hauling is required, should that cost be included in the fixed monthly and annual prices?
     - **Never been an issue and have never had snow hauled away, and we have had some harsh winters in the past 10-12 years. During the most active winters, we may lose a parking spot or two due to the snow piles, but that also has never been an issue.**
2. Will the Government consider the past experience of a proposed subcontractor who will perform the snow removal work in evaluating the Past Experience factor?
   a. **Past Performance of the Prime and specific Subcontractor may be considered- show whom has the experience**
3. Should monthly pricing be quoted as 12 equal monthly payments per year, or only for the winter months when service is performed?
   a. **The Combined Synopsis/Solicitation has been updated with a pricing schedule to reflect requested pricing on a per removal basis, utilizing an estimate of average snow removal incidences annually, during the winter months when service is performed. The POP is annual due to the unknown actual dates of future snowfall. Invoicing and payment will be for actual services provided monthly, at the quoted FFP rates.**
4. Will contractor personnel require PIV credentialing or escorted access under 52.204-9?
   a. **We have never had PIV credentialing for our snow contractors in the past. There is a contractor sign in log book at the front door, and there are two gate access points that WFO Detroit staff will have to ensure are unlocked for service.**
5. Since this is a firm-fixed price contract, if we quote $1,000.00 a month but it only snows three times, will that month still be $1,000.00 charged to the government?
   a. **See answer for question # 3.**

6. We just completed a 5-year snow removal contract with the NOAA in Gaylord, but it was a BPA. Each month was a different price due to how often it snowed. It seems like this solicitation is a firm monthly price no matter how little or how often it snows. Is that correct?
    a. **This is a FFP per service rendered. The CSS has been updated to reflect this. Please see question # 3 for additional info.**
7. For the past experience section, may we use similar work done within the last two years by a named subcontractor that will perform the snow removal? Or must that work be in the prime contractor's name?
    a. **See answer to question# 2**
8. We do not see FAR 52.219-14 in the clause list. Is this small-business purchase at or below the simplified acquisition threshold, with no limitation on subcontracting? If a limit applies, please identify the rule for this bid.
    a. **52.219-14 is not included as this is a Total Small Business Set-Aside under SAT.**
9. Lot size — the SOW doesn't state the paved area. Could you share the parking lot size (square footage or number of spaces), driveway area, sidewalk/walkway length, and the size of the fenced upper air compound?
    a. **35 Space Parking lot with about 12,500 square feet; 215 foot two-lane driveway; 615 feet of single lane access road to Upper Air and Radar; Another ~500 square feet around Upper Air/Radar site to plow; ~700 square feet to shovel around the Upper Air AROS; ~250 to 300 feet of sidewalk to be shoveled.**
10. Snow trigger — where is the 2-inch accumulation measured, and who calls for service when the trigger is met?
    a. **Snowfall is officially measured at our NWS office. We usually call for service when needed, including for snow less than 2 inches and/or ice melt. For organized snow events, we will call and arrange for services before snow accumulation to hit shift changes appropriately.**
11. Ice melt — the SOW calls for safe ice-melt granules. Is there an approved product list, or any surface where chloride-based melt may not be used?
    a. **We cannot use salt (chloride based product) at the fenced-in compound (AROS). It also shouldn't be used on the concrete.**
12. Dumpster access — must the dumpster area be kept clear at all times, or only on pickup days?
    a. **Dumpster access must be clear as it is an egress area between main building and parking lot, shed storage, and weather observation area.**
13. Wage determination: The solicitation applies Service Contract Act WD 2015-4833 (Rev. 32, 8/13/2026), which covers Washtenaw County, Michigan. The place of performance, White Lake, MI 48386, is in Oakland County. Which wage determination should offerors use to price this work?

a. **Wage Determination has been updated to WD#2015-4839, Rev 32, dated 08/22/2026.**

14. Monthly pricing: The solicitation asks for monthly and annual pricing, with invoices billed monthly in arrears. Should the monthly price be billed for all 12 months of each period (annual price = 12 x the monthly price), or only for the snow-season months? If only the snow season, which months should we price?
    a. **Please see answer to question # 3.**
15. Snow events: Does the fixed monthly price cover all snow removal in that month (every snowfall of 2 inches or more and every request from the MIC), with no separate per-event charge?
    a. **Please see answer to Question # 3.**
16. The attached wage determination, WD 2015-4833 Rev 32, states its area as Michigan Counties of Washtenaw. The place of performance is White Lake, in Oakland County. Could you confirm the correct wage determination for this requirement?
    a. **See answer to Question # 13**
17. Our SAM registration will add NAICS 561790, with activation expected November 19, 2026 — after the November 13 quote due date. Could you confirm that we may submit a quotation with the NAICS code pending activation?
    a. **Yes, you may submit a quote. However, any potential award cannot be made without the proper NAICS .**
18. Experience (Factor 2). The quote instructions ask for "the Quoter's background and past performance on contracts performing the same or similar requirements within a 2 year period," and Section 7 evaluates the Quoter's "background, experience, and qualifications." May the quote include the snow removal experience of our proposed subcontractor, who will perform the work, together with our own current federal snow removal contract?
    a. **See answer to Question # 2**
19. Wage determination. The RFQ incorporates WD 2015-4833 Rev 32, whose area is "Michigan Counties of Washtenaw." 9200 White Lake Road is in Oakland County. Please confirm which wage determination applies to this contract.
    a. **See answer to Question # 13**
20. After-hours access. The Statement of Work requires snow removal whenever 2 or more inches fall and within two hours of a request, which will often fall at night, on weekends and on holidays. Paragraph 3 of NAM 1330-52.237-72 requires a written request through the COR 72 hours before access outside normal business hours (the blank is not filled in). Please confirm that snow removal crews will have standing access at any hour under this contract, and how they will get into the fenced upper-air compound after hours.
    a. **Snowfall is officially measured at our NWS office. We usually call for service when needed, including for snow less than 2 inches and/or ice melt. For organized snow events, we will call and arrange for services before snow accumulation to hit shift changes appropriately.**
21. Pricing format. The schedule asks for "monthly and annual pricing for each base and option year." Please confirm whether the monthly price is the annual price

divided by 12 and billed every month of the year, or billed only during the snow season (and if so, which months).

a. **See answer to Question # 3**

22. Site details. Please provide the approximate paved area of the parking lot and entrance drive and the linear feet of sidewalk, or a site plan. If available, please also share the number of snow removal call-outs per season under the previous agreement (1305M323ANWWR0001).
    a. **See answer to Question #9**
23. Site visit. Amendment 0002 names Joshua Van Drese (248-625-3309 x372) as the site-visit contact, while Section 5 still lists Jeff Garmon and Casey Keating and the synopsis lists Richard Pollman. Please confirm Mr. Van Drese is the contact, and that our subcontractor's representative may attend the site visit on our behalf.
    a. **The amendment is correct**
