Questions due	11/13/2026 by 2p ET.
Site visit	11/06/2026 at 9am ET
Quotes due	11/24/2026 by 10a ET
Submission to	ckesselman@fbi.gov
Government point of contact	Candice Kesselman, Contracting Officer

1. Purpose

The Federal Bureau of Investigation (FBI) requests quotations for non-personal commercial Window Maintenance and Cleaning Services at the CJIS Division campus in Clarksburg, West Virginia. The Government anticipates awarding one firm-fixed-price contract for the recurring services, with separately authorized as-needed repair and replacement work as described below. This RFQ is not authorization to begin work.

This acquisition is being conducted as a 100% Small Business Set-Aside for commercial services in accordance with FAR Part 12 and FAR Subpart 13.5, as implemented by applicable Department of Justice/Federal Bureau of Investigation FAR Overhaul deviations. The Government intends to award a single Firm-Fixed-Price contract to the responsible quoter submitting the lowest-priced, technically acceptable quotation, provided the price is determined fair and reasonable.

Attachment 1, Statement of Work (SOW), Window Cleaning and Maint - SOW 10.29.2026, establishes the technical requirements. If an inconsistency exists between the solicitation and SOW, the CO must resolve it by amendment before award.

2. Scope and Place of Performance

The work includes scheduled interior/exterior window cleaning; yearly window inspections; window maintenance; emergency securing of damaged or broken openings; and repair/replacement work when specifically authorized. The SOW covers curtain wall, bullet-resistant, arched, sloped, and other window systems. Work is at the FBI CJIS campus in Clarksburg, WV.

Recurring cleaning: once annually at the Biometrics Tech Center (BTC), Visitors Center, Service Center, Police Services Building, and Daycare Center; twice annually at the CJIS Main Building. Annual inspection: CJIS Main Building and BTC. Campus-wide emergency response: within 24 hours of notification, including the Visitors Atrium. The SOW also requires specified high dusting and hanging-light cleaning.

Contract period	SOW approximate cleaning area	Special work
Base	230,000 sq. ft.	Standard SOW work
Option 1	234,000 sq. ft.	BTC Stair 6 glass-walled staircase
Option 2	377,000 sq. ft.	BTC interior curtain wall cores (~147,000 additional sq. ft.)
Option 3	230,000 sq. ft.	Standard SOW work
Option 4	230,000 sq. ft.	Standard SOW work

Safety and access: equipment must be no wider than nine feet where passing through perimeter walls; contractor-provided anchoring/fall protection must meet OSHA/ANSI requirements and be submitted for CJIS Safety approval. Some areas lack fixed anchors.

Normal work hours are 7:00 a.m.–3:30 p.m. Eastern Time; additional scheduling limitations and access/security requirements appear in **Attachment 1.**

3. Period of Performance

Period	Start	End
Base	01/21/2027	01/20/2028
Option 1	01/21/2028	01/20/2029
Option 2	01/21/2029	01/20/2030
Option 3	01/21/2030	01/20/2031
Option 4	01/21/2031	01/20/2032

** Option periods are exercisable only through written action by the Contracting Officer under the terms of the resulting contract.

4. Contract Line Items and Pricing

Offerors shall complete **Attachment 2, Price Schedule**, for scheduled recurring window cleaning and annual inspections. Offerors shall also quote fully burdened hourly labor rates for emergency response services for each contract period using the Emergency Hourly Rate Schedule. No estimated emergency hours, repair quantities, or replacement costs are solicited. Emergency hourly rates are separate from annual firm-fixed-price CLINs.

CLIN series	Description	Pricing basis
0001 / 1001 / 2001 / 3001 / 4001	Scheduled window cleaning and associated SOW cleaning/high-dusting tasks	Annual firm-fixed price, each period
0002 / 1002 / 2002 / 3002 / 4002	Annual window inspection and findings report	Annual firm-fixed price; include inspection day rate in supporting schedule

References in Attachment 1 (SOW) to pre-award unit prices for repairs and replacements are superseded for solicitation pricing purposes. No estimated repair or replacement cost or quantity is requested. Emergency labor hourly rates, however, MUST be quoted with the initial quotation.

As-needed repairs and replacements shall be priced on a case-by-case basis after the Government identifies the requirement. Emergency services are not included in annual FFP CLINs. The contractor must be available to respond within 24 hours of Government notification to secure damaged or broken window openings. Offerors shall submit fully burdened emergency labor hourly rates with their quotations. Before any emergency or repair work is performed, the CO must issue written authorization and establish funding; the emergency response requirement does not itself authorize unfunded work. The Government will request an event-specific quote

showing estimated hours by labor category at the quoted rates, equipment, materials, and other applicable charges. No minimum volume of emergency or repair work is guaranteed.

5. Instructions to Quoters

Submit one electronic quotation by **11/24/2026 by 10AM, Eastern Time.** Quote shall remain valid for 60 calendar days. Clearly identify RFQ number, legal business name, UEI, CAGE code, address, contact information, and SAM registration status.

Volume I — Technical quotation

A. Technical approach: describe the planned cleaning schedule and methods, inspection and reporting approach, quality control, and capability to secure broken window openings within 24 hours of notice. Address specialized glass and access conditions in the SOW.

B. Safety and access: provide a site-specific fall protection/anchoring concept, equipment inventory with widths and loads, personnel safety qualifications, protection of occupants and landscaping, and coordination plan for CJIS Safety review. No proposed method may presume use of Government anchor points where none exist.

C. Relevant experience: provide up to three examples of comparable occupied-facility window cleaning/inspection and glazing maintenance work, preferably involving elevated or specialized glazing, with customer contact, dates, scope, and approximate magnitude.

D. Staffing and management: identify responsible manager, staffing plan, subcontractors (if any), emergency point of contact, and plan to meet FBI facility access requirements. Do not include unnecessary personal identifying information in the quotation.

Volume II — Price quotation

Complete all base and option period prices and the separate unit-price schedule. Identify any assumptions or exclusions; exceptions to mandatory SOW requirements may result in an unacceptable quotation. Price all special option-year work in the applicable year. Provide fully burdened rates; do not assume additional reimbursement for travel or other direct costs absent CO authorization.

6. Evaluation and Basis of Award – LPTA

The Government intends to make award to the responsible quoter submitting the lowest evaluated price among quotations determined technically acceptable, provided the price is fair and reasonable. The Government will not award additional credit for exceeding minimum technical requirements or conduct technical/price tradeoffs. The Government may seek clarifications as permitted by the applicable procedures and may make award without further exchanges.

Factor	Rating	Minimum acceptability standard
1. Technical approach	Acceptable / Unacceptable	Demonstrates a workable approach satisfying all recurring cleaning, inspection, reporting, and 24-hour response requirements.
2. Safety and access	Acceptable / Unacceptable	Addresses OSHA/ANSI fall protection, site-specific anchor constraints, nine-foot equipment-width limit, occupant/grounds protection, and safety review.
3. Relevant experience / resources	Acceptable / Unacceptable	Shows capability and resources for similar window cleaning and specialized glazing maintenance work at the required scale.
4. Price	Evaluated, not rated	Complete base and four option-year pricing; evaluated under stated methodology.

An unacceptable rating on any technical factor makes the quotation ineligible for award. The Government will evaluate the sum of recurring cleaning and inspection firm-fixed prices for the base and all four option years to determine the lowest evaluated price. Quoted emergency hourly rates will be reviewed for reasonableness but, absent Government-estimated hours, will not be extended or included in the LPTA price ranking. The Government reserves the right to address unreasonable or unbalanced rates before award.

LPTA use must be supported by a separate acquisition-file determination addressing the applicable FAR Overhaul/agency-deviation restrictions and any special concerns regarding complex high-elevation or bullet-resistant glazing work.

7. Performance Administration

The contractor shall provide a report for each site visit showing date/time, problems, corrective measures, possible causes, and preventive recommendations. Annual inspections shall also

include sealant/caulking quantities and locations, faulty unit types and locations, failure analysis, and proposed repair pricing. The COR inspects and accepts services within delegated authority; only the CO may modify scope, price, terms, or authorize additional work.

Contractor personnel must meet FBI site access screening and security requirements in the SOW. The SOW states that classified information and FBI information system access are not required. The contractor shall coordinate schedules, protect Government property, remove debris, and comply with applicable safety and environmental requirements.

8. Questions, Site Visit, and Amendments

Submit written questions to ckesselman@fbi.gov no later than **2PM, Eastern Time on 11/13/2026.** The Government may publish written consolidated answers as a reply to the questions. Oral statements do not amend the solicitation.

A site visit will be held on **9AM, Eastern Time on 11/06/2026,** subject to CJIS visitor approval and security procedures. **For those who wish to attend the site visit, please submit a Visitor's Access Request (VAR) form to ckesselman@fbi.gov, no later than 11/02/2026. Once VAR approval is granted, please ensure each individual in attendance, presents a REAL ID at the time of arrival. This is the acceptable identification for site access. Quoter must not contact facility personnel directly regarding procurement matters unless authorized by the CO.
