ATTACHMENT 4
CLIN 0003: Exercise Support Specialist

Contractor Qualification Criteria

NCETR, through funding provided by Department of the Army (DA) G-38, conducts a Military Explosive Ordnance Disposal (EOD) and Public Safety Bomb Squad (PSBS) interoperability exercise, at multiple sites throughout the country, fostering an exchange of tools, techniques and procedures between the two related, but different, missions.

Technical Proficiency:
Exercise Support Specialists should be capable of:

1. Conducting all EOD related duties during the execution of the exercise.

2. Monitoring and guiding explosives operations and actions during the exercise for the safety of all participants and staff, for use in Hot Wash and After Action Reviews, and to facilitate the latest technological threats in the Improvised Explosive Device (IED) arena.

3. Supporting other interests at the exercise such as providing explosives control, intelligence generation, and logistical support for site development and execution.

4. Supporting law enforcement operations/exercises with downrange support of explosive operations and creating the scenarios and documenting the results with technical proficiency.

5. Training the Observer/Controllers (OC) in the application of intelligence, explosive operations, and post blast scene investigation.

6. Training the OCs in the proper use of technical equipment to support the Exercise, therefore, they must be experienced law enforcement instructors.

7. Physically lifting heavy equipment (up to 50 lbs and carrying it up to 50 feet) and operating in remote areas in travel status for up to 15-30 days.

8. Selecting, installing, maintaining and troubleshooting/repairing technical equipment used to support the Exercise.

9. Supporting live fire explosive operations, and providing a vast working knowledge of explosives defeat operations.

10. Organizing and leading a team comprised of evaluators and operators from multiple personnel from Federal Agencies; Military and local law enforcement.

Education/Experience and Certification Requirements:

11. A Bachelor's degree from an accredited college or university with a minimum of ten years subject matter related work experience, law enforcement field and/or training

experience with a major portion of this experience in the subject area to be instructed (preferred).

Or

A high school education with a diploma or a GED equivalency certificate and 15 years of general law enforcement or field related experience may be substituted for a Bachelor's Degree.

Or

A Graduate degree, with a minimum of 5 years working, instructing, or conducting research in the subject area at a level exceeding the students to be taught.

12. Extensive experience handling explosives and operational safety associated with explosive operations and crime scenes.

13. Extensive experience conducting EOD or IED mitigation operations.

14. Experience in Post Blast training and investigations.

15. Experience developing intelligence for use in exercise scenarios

16. Experience working around live explosives and be fully knowledgeable of downrange explosive operations and safety.

17. Experience evaluating complex improvised explosive devices and testifying as to the functioning of these devices in court proceedings.

18. Special consideration may be given to:

    - Graduates of either Hazardous Devices School – Basic Course or Naval School Explosive Ordnance Disposal (EOD)
    - Past experience working on a Raven's Challenge exercise either as support or as an Observer/Controller will be given special consideration.
    - Past experience as an ATF Explosive Enforcement Officer completing Destructive Device Statements or equivalent.
    - Knowledge of homemade explosives
    - Strong background in ATF Communications, including, operation of the various ATF Mobile Command Vehicles.

19. Provide approach to maintain the currency of subject matter expertise and updates to continuing education and required certifications.

20. Provide verifying documentation, upon request, (e.g., certificate of successful completion or attendance) demonstrating maintenance of subject matter currency through recent continuing education and training activities in the subject matter being taught. Subject matter currency may also be validated through the publication of subject matter related articles and research in nationally recognized professional journals or trade magazines.
