ATTACHMENT 7
CLIN 0006: Canine Trainer – NORT

Contractor Qualification Criteria

Technical Proficiency:

1. Trainers must possess law enforcement, investigational application of detector canines, explosives training skills, experience with various canine training methodologies, or have unique experience, education, and training to support ATF's commitment to train superior explosives and accelerant detector canines. These trainings and experiences are highly regarded skill sets and are required for specialty programs at NCETR.

2. Areas of expertise desired by Canine Trainers include, but are not limited to:

   - Various Canine Training Methodologies
   - Classical and Operant Conditioning
   - Various Reward System Training
   - Training/Handling Various Canine Breeds
   - Target Odor Recognition deficiencies
   - Non-productive Responses (NPR)
   - Target Odor Responses
   - Canine Basic and Emergency Care
   - Explosives Classification
   - Explosives Laws and Regulations
   - Explosives Odor Testing Procedures
   - Federal Explosives Laws and Regulations

3. ATF uses a variety of instructional methods, including classroom lectures and demonstrations, practical exercises (PE), and odor recognition testing. The contractor shall provide input for the revision or amendment of the lectures, demonstrations, and exercises to provide updated materials, as appropriate and necessary for the course requirements.

4. Many courses require the instructor to provide both classroom as well as practical instruction.

5. Contractor rates will be used for all services including, but not limited to, instruction, practical instruction, and course development.

6. Contractor shall be flexible and available seven (7) days per week to include holidays if warranted.

7. Exceptions may be made to contractor instructors who possess unique qualifications based on industry experience.

Education/Experience and Certification Requirements:

8. Minimum five (5) years' experience with and proficiency in the following:
   - A comprehensive understanding of practical canine training principles including classical and operant conditioning.

   - Utilization of various reward systems in training detection canines (ball, Kong, tug, food, etc.)

- Handling and/or training various canine breeds.
- Training handlers who practice various training methodologies and techniques.
- Training handler with different skills, experience, and proficiency levels.
- Problem-solving canine performance issues, including target odor recognition deficiencies, non-productive responses (NPR), unwanted aggressive response or "pawing" at target odor search containers or concealments.

9. Minimum fine (5) years' experience in law enforcement, particularly the investigational application of detector canines.

10. Minimum five (5) years' experience with the recognition, use and handling of explosives as well as a complete understanding of Federal and state storage regulations.

11. Minimum five (5) years' experience with various canine detector training methodologies, to include explosives and accelerant detection.

12. Minimum three (3) years' experience operating all classroom multimedia devices.

13. Shall assist in setup and cleaning of training site and training courses. Also, assist with transportation of training materials to sites, if warranted.

14. Must be able to provide basic and emergency first aid when needed, to include CPR if warranted. Must utilize prescribed safety methods and procedures in handling trained and untrained canines in kennel areas, public environments, and veterinary treatment facilities. Required to report all injuries, canine bites, and safety issues immediately.

15. Special consideration may be given to those who possess experience instructing ATF/NCETR training programs within three years of proposal submission.

16. Canine Trainers must have documentation of training experience, to include certificates of completion, curriculum vitae and/or resume.
