QUESTIONS AND ANSWERS

1. Section B prices fourteen contract line items, including 75 to 90 and 100 to 120 ton cranes and several forklift or cargo handler classes above and below those listed in the Performance Work Statement on pages 5 and 6. Which equipment classes control the price schedule, fleet matrix and operator credential coverage for a quotation?

The equipment classes listed in Section B (CLINs 0001 through 0008) of the solicitation control the price schedule, fleet matrix, and operator credential coverage requirements for a quotation. Even though these classes exceed or differ from the baseline equipment sizes described in pages 5 and 6 of the Performance Work Statement (PWS), Section L of the solicitation explicitly requires that the quote includes:

Price Schedule Control: A completed Section B Price Schedule with all CLINs filled (CLINs 0001–0014, including the larger 75–90 ton and 100–120 ton cranes, as well as the extended forklift and cargo handler classes).

Fleet Matrix Control: A Fleet Availability Matrix covering all proposed equipment classes.

Operator Credential Control: Operator Credentials and Certifications verifying qualifications (e.g., NCCCO for crane operators, OSHA compliance for forklift operators) for all proposed classes.

The PWS indicates **potential** crane services that might be ordered, and the contract is written to cover each of these specific equipment classes **in case of necessity** to ensure full coverage and operational readiness when a task order (BPA Call) is issued.

2. The solicitation incorporates Service Contract Labor Standards, but the current public attachment inventory contains no wage determination. Please identify the applicable determination and labor classifications or confirm the documented exception that applies to this acquisition.

The solicitation is subject to the Service Contract Labor Standards (FAR 52.222-41). Because this Blanket Purchase Agreement (BPA) encompasses requirements across multiple locations throughout the State of Alabama, specific performance sites vary by individual call.
In accordance with FAR 22.1009 and 29 CFR 4.4, the applicable Department of Labor Wage Determination for the specific county in which work is executed will be incorporated into each individual BPA Call upon issuance. Contractors are required to comply with the prevailing wage and fringe benefit rates established for the performance county.
For quotation preparation and baseline labor mapping, applicable SCA labor classifications include, but are not limited to: Crane Operator (Code 23440), Forklift Operator (Code 21020), Heavy Equipment Operator (Code 23440), and Rigger (Code 23850).

3. The technical volume calls for two or three past performance projects, and Section M evaluates the offeror's past performance. May a prime include clearly attributed references for a disclosed equipment and operator subcontractor, and how will those be considered in the past performance assessment?

Yes. Offerors may submit past performance references for proposed subcontractors, provided that:

The subcontractor is clearly identified with their specific division of responsibilities mapped to Section B CLINs (e.g., designated equipment classes and operator support).

The proposal includes an executed Letter of Commitment or Teaming Agreement confirming the subcontractor's agreement to perform under the resulting BPA.

The references directly reflect work of similar size, scope, and complexity to the subcontractor's proposed effort.

In accordance with Section M, past performance information of a proposed subcontractor will be considered in direct proportion to the criticality and magnitude of the effort they will perform. Subcontractor performance history will not wholly substitute for the prime contractor's demonstrated ability to manage and administer the overall contract.

4. Please identify whether the limitation on subcontracting for a total small business set aside applies to this blanket purchase agreement or to its funded calls and, if applicable, the clause and calculation basis the Government will use. The current solicitation does not list Federal Acquisition Regulation clause 52.219-14 among the incorporated clauses.

The solicitation is a Total Small Business Set-Aside. In accordance with FAR 19.507(e) and 13 CFR 125.6, the limitation on subcontracting applies to this acquisition.
Clause Incorporation: A forthcoming solicitation amendment will formally incorporate FAR 52.219-14 (Limitations on Subcontracting).

Application Level & Calculation Basis: In accordance with FAR 52.219-14(e)(1) and 13 CFR 125.6(f), the limitation on subcontracting will be applied and calculated on a cumulative basis across all funded BPA Calls issued over the entire performance period of the Blanket Purchase Agreement, rather than on an order-by-order basis.

Percentage Threshold: The small business prime contractor will not pay more than 50 percent of the total amount paid by the Government for contract performance to subcontractors that are not similarly situated entities. Any work performed by a similarly situated subcontractor (i.e., another small business under NAICS 532412) will not count toward the 50 percent subcontracting limitation.

5. The solicitation incorporates FAR 52.219-6 (Notice of Total Small Business Set-Aside) but does not list FAR 52.219-14 (Limitations on Subcontracting). Does the limitation on

subcontracting apply to this 100% small-business set-aside service BPA, and if so, what is the applicable percentage and how is it measured — per BPA call order, per year, or over the full five-year ordering period? May work performed by a similarly-situated small-business subcontractor count toward the prime contractor's performance?

Yes, the limitation on subcontracting applies. A forthcoming solicitation amendment formally incorporates **FAR 52.219-14 (OCT 2022)**.

Threshold: The prime contractor will not pay more than **50 percent** of the total amount paid by the Government for contract performance to subcontractors that are *not* similarly situated entities.
Measurement Period: In accordance with FAR 52.219-14(e)(1) and 13 CFR 125.6(f), compliance will be evaluated **cumulatively across all funded BPA Calls issued over the entire five-year BPA ordering period**, rather than on an order-by-order or annual basis.
Similarly Situated Entities: Yes. Work performed by a similarly situated small business subcontractor (an eligible, small entity under NAICS 532412) **counts toward the prime contractor's 50% performance requirement** and is excluded from the subcontracting cap.

6. The solicitation incorporates FAR 52.219-6 (Notice of Total Small Business Set-Aside) but does not list FAR 52.219-14 (Limitations on Subcontracting). Does the limitation on subcontracting apply to this 100% small-business set-aside service BPA, and if so, what is the applicable percentage and how is it measured — per BPA call order, per year, or over the full five-year ordering period? May work performed by a similarly-situated small-business subcontractor count toward the prime contractor's performance?

Yes, the limitation on subcontracting applies. A forthcoming solicitation amendment formally incorporates FAR 52.219-14 (OCT 2022).

Threshold: The prime contractor will not pay more than 50 percent of the total amount paid by the Government for contract performance to subcontractors that are not similarly situated entities.

Measurement Period: In accordance with FAR 52.219-14(e)(1) and 13 CFR 125.6(f), compliance will be evaluated cumulatively across all funded BPA Calls issued over the entire five-year BPA ordering period, rather than on an order-by-order or annual basis.

Similarly Situated Entities: Yes. Work performed by a similarly situated small business subcontractor (an eligible, small entity under NAICS 532412) counts toward the prime contractor's 50% performance requirement and is excluded from the subcontracting cap.

7. PWS §5.1.1.1 lists potential crane sizes of 30, 40, 50, 60, and 70 tons, but Section B CLINs 0001–0004 call for mobile cranes of 30–40, 50–65, 75–90, and 100–120 tons. Please confirm quoters must be able to supply cranes in all four CLIN ranges, including 75–90 and 100–120 tons.

Confirmed. Quoters must be capable of supplying cranes across all four Section B CLIN ranges, including CLIN 0003 (75–90 Ton) and CLIN 0004 (100–120 Ton). While PWS §5.1.1.1 highlights common baseline operational requirements, Section B represents the complete schedule of equipment that the Government may order in case of mission necessity. Offerors must complete the Price Schedule and demonstrate equipment access and certified operator credentials for all four crane CLINs.

8. PWS §5.1.1.2 lists potential forklift sizes of 10,000, 20,000, and 30,000 lbs, but Section B CLINs 0005–0008 call for forklifts of 5,000–6,000, 10,000–12,000, 15,000–25,000, and 30,000–50,000+ lbs. Please confirm quoters must be able to supply forklifts in all four CLIN ranges, including the 30,000–50,000+ lb heavy cargo/container handler.

Confirmed. Quoters must be capable of supplying forklifts/cargo handlers across all four Section B CLIN ranges, specifically including CLIN 0008 (Heavy Cargo / Container Handler, 30,000–50,000+ lbs). Section B controls the pricing schedule and mandatory fleet capability. All four forklift/cargo handler CLINs must be priced and supported in the technical submission.

9. FAR 52.222-41 (Service Contract Labor Standards) is incorporated, but no wage determination is attached to the solicitation. Which wage determination(s) apply to the crane and forklift operator labor, given that BPA calls occur statewide across multiple Alabama counties? Will the government provide the applicable wage determination(s)?

FAR 52.222-41 applies. Because this BPA provides statewide support across all 67 Alabama counties and call locations are not known in advance, the specific Department of Labor (DOL) Wage Determination (WD) applicable to the county of performance will be incorporated into each individual funded BPA Call upon issuance, per FAR 22.1009 and 29 CFR 4.4.

For baseline rate structuring and wage mapping across Alabama, offerors must ensure compliance with the following standard SCA Directory of Occupations classifications: Crane Operator (Code 23440), Forklift Operator (Code 21020), Heavy Equipment Operator (Code 23440), Rigger (Code 23850), and Truckdriver, Heavy/Tractor-Trailer (Codes 31363/31364).

10. DFARS 252.204-7012 (Safeguarding Covered Defense Information and Cyber Incident Reporting) is incorporated. Does performance under this BPA involve covered defense information or controlled unclassified information? If not, please confirm the clause will not apply.

Performance under this commercial equipment rental/wet-lease BPA does not involve the generation, receipt, or processing of Covered Defense Information (CDI) or Controlled Unclassified Information (CUI) on contractor information systems. While DFARS 252.204-7012

remains incorporated in the master solicitation pursuant to DoD acquisition policy, the specific cybersecurity safeguarding and reporting mandates tied to CDI/CUI will not actively apply to routine crane/forklift dispatch, rental, and operation unless CDI is explicitly transferred in a specific call order (which is not anticipated).

11. Factor 2 asks for 2–3 recent, relevant wet-lease crane/rigging projects on military or federal sites. May the prime offeror cite the past performance of a subcontractor that will actually perform the work, and if so, how should subcontractor past performance be presented in Volume I? For a new offeror with no prior contracts, is past performance rated neutral rather than as a deficiency?

Subcontractor References: Yes. Offerors may submit past performance references for a proposed equipment/operator subcontractor, provided that Volume I includes a signed Letter of Commitment / Teaming Agreement detailing the subcontractor's specific role and scope of work. Subcontractor references will be evaluated in direct proportion to the criticality and percentage of work they are proposed to perform, but will not wholly substitute for the prime's administrative capability.

New Offerors (No Prior Record): In accordance with FAR 15.305(a)(2)(iv), an offeror without a record of relevant past performance or for whom information on past performance is not available will be rated "Neutral" (Acceptable/Unknown Confidence) and will not be evaluated favorably or unfavorably

12. The solicitation states the government will award "one or more" Blanket Purchase Agreements. Will there be a single award or multiple awards, and is there an estimated number of BPA call orders per year or a guaranteed minimum beyond the four-hour minimum per call?

Award Quantity: The Government intends to award one or more BPAs to establish adequate regional coverage across Alabama.

Guaranteed Minimum: A Blanket Purchase Agreement is not a binding contract; therefore, there is no guaranteed minimum dollar value or guaranteed number of calls under the BPA itself. The Government's sole financial obligation is established upon issuance of an individual funded BPA Call (subject to the 4-hour minimum billing per call specified in the PWS).

Estimated Annual Calls: The Government estimates approximately 15 to 30 calls per year statewide; however, this is an estimate for planning purposes only and does not constitute a commitment.

13. PWS §5.6 requires a minimum of $100,000 in general liability insurance. Are there any additional insurance requirements — for example, automobile liability, workers' compensation, or an umbrella policy — or is the $100,000 general liability minimum the only insurance requirement?

PWS §5.6 establishes the baseline commercial general liability requirement ($100,000). However, in accordance with FAR 52.228-5 (Insurance -- Work on a Government Installation) and standard DoW commercial vehicle operations rules, the contractor and any performing subcontractors must also carry:

1. Workers' Compensation: Statutory coverage complying with Alabama State law.
2. Employer's Liability: Minimum $100,000.
3. Automobile Liability: Minimum $200,000 per person and $500,000 per occurrence for bodily injury, and $20,000 per occurrence for property damage covering all highway-legal mobile cranes, transport tractors, and service vehicles operating on military property.

Commercial umbrella policies may be utilized to meet these aggregate thresholds. Proof of required insurance must be provided prior to commencing work on any military installation.

14. CLINs 0009–0012 price mobilization/demobilization by distance zone (Zone 1: 0–35 miles; Zone 2: 36–75; Zone 3: 76–125; Zone 4: 126+). From what point is the distance measured — the contractor's yard, the nearest of the four metro areas, or the ALARNG training site?

Mobilization and demobilization mileage is measured from the contractor's (or performing subcontractor's) designated commercial equipment yard/dispatch facility to the designated ALARNG work site / delivery location, using the shortest practical route per standard commercial mapping software (e.g., Google Maps / Rand McNally). In the event the contractor dispatches from multiple regional staging yards across Alabama, mileage will be calculated from the facility closest to the call site.

15. Must NAICS 532412 be listed in the offeror's SAM registration at the time of quote submission, or is active SAM registration with a CAGE code and UEI sufficient?

Offerors must possess an Active registration in SAM.gov with an assigned CAGE Code and Unique Entity Identifier (UEI) at the time of quote submission. While NAICS 532412 (Commercial and Industrial Machinery and Equipment Rental and Leasing) should be listed on the entity's SAM profile, if it is currently pending an update, the offeror will remain eligible for award provided they qualify as a small business under the $40.0M size standard for NAICS 532412 and self-certify as such in their quotation representations.

16. Please confirm quotes are to be emailed to both the Contract Specialist and the Contracting Officer, and that the quote due time is 4:00 PM Central Time on December 7, 2026.

Confirmed. Offerors are responsible for verifying timely server receipt prior to the closing deadline.
