D. Basis for Award. (Addendum to FAR 52.212-2)

Award will be made to the responsible offeror whose conforming proposal offers the Lowest Price Technically Acceptable (LPTA) to the Government, considering technical acceptability and price.

Factor 1 – Technical Performance

Technical performance will be evaluated on a Pass/Fail (Acceptable/Unacceptable) basis. To be rated "Acceptable," the proposal must demonstrate compliance with all specifications and tasks outlined in the PWS. Technical acceptability will be determined based on the following evaluation standard:

"Can the offeror meet all requirements outlined in the Performance Work Statement (PWS), specifically Section 5.0 (Requirements) and qualification standards in Section 1.4.7?"

- Acceptable: Proposal clearly meets all operational and qualification requirements of the PWS.
- Unacceptable: Proposal fails to clearly meet the operational requirements, qualifications, or deliverables outlined in the PWS. Proposals rated Unacceptable are ineligible for award.

Factor 2 – Pricing:

The Government will evaluate price proposals from all offerors determined to be Technically Acceptable under Factor 1. Pricing will not receive an adjectival score or point rating.

1. Total Evaluated Price (TEP): In accordance with FAR 17.203, evaluation of options will not obligate the Government to exercise the option(s). The Total Evaluated Price will be calculated as the sum of CLIN 0001 (Base Year) and CLINs 1001 through 4001 (Option Years 1 through 4).
2. Completeness: The Government will verify that all required CLINs are priced and that pricing accounts for all requirements identified in the PWS.
3. Reasonableness & Balance: Evaluated prices will be reviewed to determine if they are fair and reasonable and balanced across performance periods. A price that is found to be unreasonably high or unrealistically low may be rejected.

Award will be made to the responsible offeror with the lowest Total Evaluated Price among all proposals rated as Technically Acceptable.
