ATTACHMENT II
CONTRACT PROPOSAL REQUEST INSTRUCTIONS – ELEVATOR REPAIR AND MAINTENANCT SUPPORT SERVICES
SOLOCIATION W91RUS-27-R-A002 0001

1. The U.S. Army has a requirement for Repair and Maintenance of elevators on Fort Huachuca, Arizona. For this effort, the Government anticipates awarding a Firm Fixed Price (FFP) contract. It is requested that you submit a complete proposal package (including all requirement documents - i.e.: general, technical, price, etc.) for consideration in support of this Proposal Request.

Proposal Request Issue Date	30 October 2026
Questions Due Date and Time	11 December 2026, 10:00 AM Mountain Time
Proposal Closing Date and Time	08 January 2027, 10:00 AM Mountain Time
Period of Performance	Please see below
Contract Specialist	Thomas Carpenter thomas.l.carpenter.civ@army.
Contracting Officer	Shelby Burroughs shelby.l.burroughs.civ@army.mil

2. **Anticipated Period of Performance:**

Base Period:	01 March 2027 through 29 February 2028
Option Period 1:	01 March 2028 through 28 February 2029
Option Period 2:	01 March 2029 through 28 February 2030
Option Period 3:	01 March 2030 through 28 February 2031
Option Period 4:	01 March 2031 through 29 February 2032
FAR 52.217-8:	01 March 2032 through 31 August 2032

3. Pursuant to Federal Acquisition Regulation (FAR) Clause 52.232-18 Availability of Funds, funds are not presently available for performance under this contract. The Government's obligation for performance is contingent upon the availability of appropriated funds from which payment for task order purposes can be made. No legal liability on the part of the Government for any payment may arise for performance under the anticipated task order until funds are made available to the Contracting Officer for performance.

4. Information for the submission of clarification questions is contained in the proposal's submission instruction Proposal Request document.

5. The Contracting Officer reserves the right to withdraw and cancel the proposed

contract. In such an event, Contractors shall be notified in writing of the decision. This decision is final and conclusive and shall not be subject to the Disputes Clause or the Contract Disputes Act. If you have any questions or require additional information, please contact Thomas Carpentar at thomas.l.carpenter.civ@army.mil or Derrell Hawthorne at derrell.l.hawthorne.civ@army.mil

SECTION A: CONTRACT PROPOSAL REQUEST - Instructions

1. The Government is issuing a competitive Proposal Request. Key information is provided below.

KEY INFORMATION	
Location	Fort Huachuca, AZ
Proposal Request Issue Date	30 October 2026
Site Visit Date	04 December 2026, 1:00 PM Mountain Standard Time
Questions Due	11 December 2026, 10:00 AM Mountain Standard Time
Proposal Closing Date/Time	08 January 2027, 10:00 AM Mountain Standard Time
Amended Proposal Request Attachments	I - Performance Work Statement (PWS) (Removed Access Restriction) II - Proposal Instructions III - Standard Form 1449 (Solicitation document) IV - Question Submittal Spreadsheet V - Service Contract Act Wage Determination VI - JITC Security Base Access Request Instructions VII - Visit Slides VIII - Site Visit Instructions

2. Submission instructions are designed to provide overall general guidance on preparing you proposal responses as well as providing specific instructions on proposal organization, format, and content. Offerors shall include all documents and information requested. All proposals must be submitted in accordance with these instructions.

3. The Offeror shall include with the proposal response a cover sheet that contains the company's name, address, telephone number, name, title of the person authorized to sign and negotiate. Each proposal must be validated for a period of ninety (60) days or more from the initial submission date. The submission date shall be included on the cover sheet.

4. Statements of Compliance: Each Offeror shall include a statement indicating complete compliance with the Proposal Request, or detailed analysis of any objections, exceptions, contingencies, or additions. Any objections, exceptions, contingencies, or additions shall include an appropriate rationale and must be cross-referenced to the paragraph(s) in the Proposal Request document to which they apply. Offerors are cautioned that taking any exception to any requirements (including objectives and constraints) or terms and conditions of the Proposal Request are at their own risk. Without discussions, the Government may reject an offer containing any such exceptions. If no exceptions are taken, the Offeror shall include the following statement in the Statement of Compliance:

a. **_[Name of Offeror] takes no exception to any requirement or terms and conditions of the Proposal Request for this requirement. Offerors shall also include the following statement: "By submission of this offer, [Name of Offeror] agrees that in performance of the contract for services at least 50 percent of the cost of contract performance incurred for personnel shall be expended for employees of the concern."**

5. The proposal requirement is defined in the enclosed Performance Work Statement. All information pertaining to technical/management support and price shall be confined to the appropriate part to facilitate independent evaluation. The Proposal shall be clear and concise, logically assembled (with all pages appropriately numbered) and referenced to applicable parts of the Performance Work Statement or Request for Proposal, as appropriate. To reduce proposal size confine submission to essential matters sufficient to define the proposal and provide an adequate basis for evaluation. **No price information shall be presented in any part of the proposal except the Price Proposal.**

Proposal submission shall be as follows:

Volume Number	File Titles	Maximum
1	General	N/A
2	Technical/Management Support	45
3	Price Proposal	N/A

NOTES: The term "pages" includes pullout drawings, tables, diagrams, charts, annexes, indices, and tables. Pages shall be 8 ½ x 11 inches in size. Pages will be single-spaced and have one-inch margins at the top and bottom of pages and 1-inch margins at the sides and in between columns. The print will have a minimum font size of 10 points, Times New Roman for tables, charts, graphics, drawings, and diagrams. All other narratives will have a minimum font size of 12 points, Times New Roman. A page printed on both the front and back will be counted as two pages. Pullout drawings will be numbered and counted as multiple pages in relation to the 8 ½ x 11-inch size limitation. The complete Technical/Management Support volume pages shall be numbered consecutively. The cover page and index of the Technical/Management Support volume are not included in the page count. Information not contained within the above limitations will not be evaluated.

Proposal volumes shall contain the following:

Volume Descriptions

VOLUME 1 – GENERAL

Proposal Transmittal Letter - A letter formally transmitting the proposal to include the following:

a. Statement of Compliance - The Offeror shall include a statement indicating complete compliance with the RFP, disclosures and certifications or detailed analysis of any objections, exceptions, contingencies, assumptions, or additions. Any objections, exceptions, contingencies, assumptions, or additions shall also cross reference the paragraph(s) in the Proposal Request document to which they apply.

b. Proprietary Information - The Offeror shall include a statement indicating whether the Offeror intends to make use of any proprietary or patent information. If use of such information is anticipated, the specific areas of use by the Offeror and its subcontractors must be clearly defined, including whether limited or unlimited rights are applicable. If applicable, the Offeror shall indicate the cost to the Government for acquisitions of each and all proprietary information identified in the proposal.

VOLUME 2 – TECHNICAL/MANAGEMENT SUPPORT

Volume 2 shall consist of a written narrative that is the Offeror's proposed solution to the requirement contained in the Performance Work Statement (PWS). The technical discussion should be practical, straightforward, specific, concise, and complete as to demonstrate clearly and fully that the offeror has a thorough understanding and knowledge of the problems inherent in fulfilling the requirements of the PWS.

SUBFACTOR 1 - Management and Quality Control Approach - The Offeror shall describe the site management methodology to accomplish the technical requirements of the PWS. The Offeror shall explain the program management methods to be employed to accomplish the technical requirements of the PWS. If subcontractors are proposed, discuss your oversight, communications and internal control plans that will ensure successful execution of the requirements. Discuss how the Government will be updated and how matters will be brought to the attention of the Government. Discuss performance and schedule control plans. Describe proposed on-site quality control procedures to include methods of monitoring performance to meet acceptable quality levels identified in the PWS.

VOLUME 3 – PRICE PROPOSAL

Provide (firm fixed) unit services prices. Enter the proposed monthly unit pricing in U.S. dollars rounded to two decimal places for phase-in, base year and all option years.

1. Services Firm Fixed Price Spreadsheet. The Offeror shall provide an Excel spreadsheet that illustrates the development of each proposed Schedule B unit price.

If unit prices are the same for each contract period, provide one schedule and state that the schedule applies to all contract periods. Identify the escalation rate for the option period and any subcontracted work. For materials purchases, identify any indirect cost rates. An explanatory price narrative is allowable.

a. Overtime - In accordance with the Fair Labor Standards Act (FLSA) Exempt labor positions normally do not qualify for overtime pay.

b. Materials – Material (Replacement Parts & Material) shall be reimbursed at actual costs for the materials purchased plus allowable indirect costs. No profit or fee is allowed.

AWARD AND PROPOSAL EVALUATION

1. Basis for Award (Trade-off). The evaluation will be based on an integrated assessment of the Technical/Management Support factor to determine which Offeror's proposal represents the best value to the Government.

a. The Government will evaluate this requirement using a best value trade-off approach. Award will be made to the Offeror whose response, conforming to the PWS, will provide the overall best value to the Government. Responses will not be accepted that do not contain clear and concise evidence of the Offeror's ability to provide work in accordance with the Proposal Request.

b. The Government will evaluate responses strictly in accordance with this Proposal Request and will not assume that performance will include areas not specified in the Offeror's proposal.

c. Interchanges are fluid interaction(s) between the KO and the Offerors that may address any aspect of the proposal and may or may not be documented in real time. The Government intends to make award based on the initial proposal submissions without conducting interchanges. Therefore, each offer should contain the Offeror's best terms from a price and technical standpoint. However, the Government reserves the right to hold interchanges using Interchange Notices (INs) if, during the evaluation, it is determined to be in the best interest of the Government to do so. Offeror responses to INs will be considered in making the contract selection decision. Interchanges may be conducted with one, some or all Offerors as the Government is not required to conduct interchanges with any or all Offerors responding to this Proposal Request.

d. The Government reserves the right to reject a response upon initial submission and to not consider it for contract award if required data is absent or the data received conveys a misunderstanding of the requirement. An Offeror may eliminate a deficiency in its response only

through interchanges; however, the Government intends to award the contract without interchanges. Therefore, each initial response should contain the Offeror's best terms from a price and technical standpoint. If revised responses are requested, they will be evaluated against the same criteria as were the initial offers.

e. Once the Government determines the Offeror that is best suited to meet stated requirements, the Government reserves the right to communicate with only that Offeror to address any issues, if necessary, and finalize an order with that Offeror. If the parties cannot successfully resolve outstanding issues, as determined pertinent at the sole discretion of the Government, the Government may communicate with the next best-suited Offeror based on the original analysis and address any necessary issues with that Offeror. If the Government begins communications with the next best-suited Offeror, no further communications with the previous Offeror will be entertained until after contract award. This process will continue until an agreement is successfully reached and a contract is awarded.

f. The Government may select for award, that response in which the total proposed price is not necessarily the lowest, but whose overall proposal is deemed sufficiently more advantageous to the Government to justify the payment of a higher price. Conversely, the Government may select for award the Offeror whose total proposed price is the lowest, when other proposals are not sufficiently more advantageous to justify the payment of a higher price. The Contracting Officer will determine which proposal represents the best overall value based on the factors described herein. Inherent in the concept of Best Value is the exercise of reasonable discretion and subjective determination by the Contracting Officer.

2. <u>Evaluation Criteria</u>. The Technical/Management Approach is more important than Price. The Technical, Management and Quality Control subfactors are of equal importance. To receive consideration for award, a rating of no less than **"Acceptable"** must be achieved for the Technical/Management factor. Offerors are cautioned that the award may not necessarily be made to the lowest priced offered. The Government intends to evaluate proposals and award a contract without discussions with offerors.

The Technical/Management Factor rating will be expressed as an adjectival assessment of Outstanding, Good, Acceptable, or Unacceptable. The adjectival ratings that will be used for evaluating the Technical/Management Factor are as follows:

Rating	Definition
OUTSTANDING	*Proposal is outstanding*. The benefits noted in the listed strengths significantly outweigh the nature of the weaknesses, if any. Very high probability of success in meeting the Government's requirements.
GOOD	*Proposal is good*. The benefits noted in the listed strengths outweighs the nature the weaknesses, if any. High probability of success in meeting the Government's requirements.

ACCEPTABLE	*Proposal is acceptable*. Proposal approach appears probable of successfully meeting the Government requirements. Any benefits noted in strengths, if any, are offset by the nature of the weaknesses, if any, or are not indicative of significantly increasing the probability of success.
UNACCEPTABLE	*Proposal is unacceptable*. A proposal which may contain errors, omissions, or deficiencies which indicates a lack of understanding of the requirements or will not meet the requirements of the PWS. Unacceptable quality; nature of the weaknesses significantly outweigh the noted benefits in any strength. Very low probability of success with an unacceptably high degree of risk in meeting the Government's requirements.

Price Evaluation Factor

A price analysis will be conducted to determine if proposed prices are fair and reasonable. The evaluated price will be derived by adding proposed prices for the Base Year and Option Year for each performance period. In addition, the Government will evaluate its Option to Extend Services (see FAR Clause 52.217-8) by adding six (6) months of the Offeror's final option period price to the Offeror's total price.
